### Oil Glut Starting to Hurt Producer Nations

Washington Past Service
BEIRUT — The persisting gut on the world oil market, en-

gineered almost entirely by San-di Arabia, is beginning to cause serious repercussions in a number of petroleum-exporting na-tions and has touched off the most intense struggle between

nies in nearly a decade.

Companies that willingly paid

#### **NEWS ANALYSIS**

high premiums and even bribes to middlemen to secure top-quality oil from countries such as Libya, Nigeria and Algeria are suddenly ready to risk their future access to treasured sources by refusing to buy at demanded prices.

As a result, production by OPEC members, other than Saudi Arabia itself, is plummeting - in some cases by as much as 50 percent — setting the scene for potential financial crises in nations once regarded as the Third World's richest. Even some non-OPEC producers, notably Mexico, have been forced to cut way back in their exports as substantial price reductions

WASHINGTON - The Penta-

gon's budget, which is already at a record level for fiscal 1982, is likely

to run as much as \$10 billion over

projections for the following fiscal

year. This poses a serious threat to

President Reagan's whole econom-

ic program, including his pledge to balance the federal budget by

Frank C. Carlucci, deputy de-fense secretary, acknowledged in an interview that the administra-

tion's rewrite of President Carter's

final two military budgets is run-ning \$2 billion to \$10 billion more

than had been anticipated in bills coming due in 1983.

The overrun would make it more difficult for the administra-

tion to meet its spending targets in future years. Congress has cut nearly \$40 billion in spending

from the 1982 budget, and, according to administration figures, will need to cut at least \$30 billion more from the 1983 budget and \$44 billion from the 1984 budget if

Those figures do not reflect the

higher-than-anticipated defense spending, which a secret internal

Pentagon memo puts at \$6 billion.

The memo warns that Mr. Reagan

either must raise the ceiling for military spending or do without some of the weapons he has or-

The record high peacetime budget of \$222 billion for fiscal 1982 will have to be raised by 9

percent after allowing for infla-tion, rather than the 7 percent planned to accommodate the pro-

jected increases, the Pentagon

"Even the planned 7-percent growth in fiscal 1983 through 1987 does not permit the services to im-

plement-all the programs planned

earlier," the memo said. It cited

Mr. Reagan's decisions to build a

new bomber, raise military pay

and construct more ships as exam-

ples of injustives that will add about \$38 billion to the fiscal 1983

## As Riots Spread, U.K. **Seeks New Deterrents**

LONDON - The British government considered harsh new measures Sunday to stamp out rioting after violence spread to nearly a score of English towns and cities during the weekend.

Political sources said that special courts could be introduced to punisb rioters swiftly. On Saturday night, gasoline bombs were thrown and stores were looted in at least 19 towns.

In London, the city worst hit by rioting on Friday night, the violence on Saturday was limited to running fights between youths and police in the Brixton area and to asoline bomb attacks on shops in Battersca.

About 160 people were arrested in London, a third of the previous night's total, and 9 pobcemen were injured compared with 49 on Friday. There were no reports of serious injuries among civilians.

#### 'Criminal Hooliganism' Cited

On Saturday, police throughout England moved in at the first sign of rioting, which they described as increasing motivated by criminal hooliganism.

Other riots, which the political sources said bore no apparent links with the first outbreaks of violence in London, Liverpool and Manchester a week ago, spread to the seaside resort of Blackpool, the northern industrial towns of Leeds, Halifax and Huddersfield and the south England port of Southampton.

In the fishing port of Hull, po-lice described a frenzy of window breaking as pure hooliganism unrelated to anything else. Elsewhere, cars were overturned and police were attacked with bricks and bottles. Four policemen in Southampton were injured when their car was stoned and crashed. Police in Leicester said that acid was thrown at them.

In London Saturday afternoon, about 300 youths, including juveniles as young as 12, appeared in courts on charges stemming from the riots. The maximum sentence imposed was three months in jail.

### Swift Sentences

Prime Minister Margaret Thatcher spent much of Saturday night with police, watching them deal with troubles in London. Informed sources said she was told by Home Secretary William Whitelaw that the rioting should be stamped on "hard and fast and

Political sources said that the government may announce this week special courts to deal with what police have increasingly described as criminal attacks. The proposal is intended to impress rioters by swift and beavy sentences. Courts could meet within hours of a riot, and those accused would be deprived of their right to trial

by jury. In addition to the courts, along the lines of those previously set up to deal quickly with soccer hooli-gans, Mr. Whitelaw has said there were plans to fine parents of children aged under 17 found guilty of street violence. Police have complained that children aged between and 16 had taken part in the Liverpool riots.

Sir Robert Mark, the former London police chief, called Saturday for the process to be speeded up. "Punishment a year after the offense is of little deterrent value,"

But The Sunday Times commented: "One would have thought that experience in Northern Ireland would have been sufficient lesson that such perversions of the judicial system corrupt the system and alienate the people."

With more than 500 policemen injured in the disorders during the forces of James II.

promised to consider introducing water cannons and other riot-control methods and better protective

clothing for the police.

Meanwhile, a political debate grew on measures to prevent riots from recurring. The Labor Party has blamed the unrest on the Conservative government's monetarist policy and n rise in unemployment to 2.68 million. Left-wing Labor politician Tony Benn said at a workers' seminar that mass youth unemployment in decaying inner city areas had created a vast social

problem that should be countered by a campaign for renewal and inased spending.

Mrs. Thatcher denies that imem ployment caused the irouble, and Leon Brittan, the chief secretary for the Treasury, said at a rally that the government would look at the needs of inner city areas "but we would be defuding ourselves and would soon be sadly disillusioned if we imagined that problems of this magnitude and character can be solved simply by throwing money indiscriminately at

British Prime Minister Margaret Thatcher observed the direction of police operations against rioters in London Saturday night with Commissioner Douglas Cree at Scotland Yard

### More Ulster Unrest; **Bomb Factory Found**

The Associated Press BELFAST - Guerrilla snipers ry was discovered in a garage 150 fired on British troops and police in several areas of Belfast early tants were to take through Belfast. Sunday and police uncovered a big Irish Republican Army bomb factory near the city center, security authoritics said.

It was the fourth straight night of violence in Roman Catholic areas of Northern Ircland since the death Wednesday of IRA hunger striker Joe McDonnell in the Maze prison near here.

No casualties were reported among security forces, but a Royal Ulster Constabulary spokesman said two young Catholics were admitted to the hospital with gunsbot wounds. It was not clear who bad shot them.

In Londonderry, police fired plastic bullets at IRA supporters hurling gasoline bombs. Several buildings were gutted, but no injunies were reported. Rioting also flared in Pomeroy, 40 miles (64 ki-lometers) west of Belfast, after police tore the Irish republican tricolor off lampposts.

The fighting heightened tensions on the eve of provincewide Protestant marches and rallies marking the 291st anniversary of the Battle of the Boyne. More than 100,000 Protestants were expected to turn out to mark William of Orange's 1690 victory over the Catholic

of homemade explosives in hags and beer kegs, along with detona-tors, timers and other materials, and that three men had been arrested after a rooftop chase. French President Francois Mitterrand regaled West German Chancellor Helmut Schmidt with a joke on Sunday as the two leaders and their aides began a round of consultations in Bonn.

### Mitterrand and Schmidt Find 'Common Language'

BONN - French President Francois Mitterrand said Sunday that he and Chancellor Helmut Schmidt have a "common lan-guage," and he said that European security is threatened by the mili-'imbalance" of East and

Arriving Sunday on his first offi-cial visit to West Germany. Mr. Mitterrand told West German television after a first meeting with Mr. Schmidt: "It was very easy to find a common language ... We share essential objectives."

Mr. Mitterrand said it was wrong to describe French-West German relations as "the Paris-Bonn axis," but he was confident that close cooperation between the two countries would continue.

On the question of East-West military balance in Europe, Mr. Mitterrand said that the Soviet Union had upset it by deploying SS-20 nuclear missiles and Backfire bombers.

"The balance of power is a condition for peace ... I really think that the latest initiatives and steps

taken by the Soviet Union — the stationing of SS-20 missiles and Backfire bombers - have resulted in a new superiority of the Soviets," he said.
"This is my impression, and ...
I must conclude that security is

threatened when this imbalance occurs," he said. Different Assessment

#### Mr. Mitterrand acknowledged that economic matters were some-

what differently assessed by Bonn and the new Paris government. But France's Socialist policies, he said, were necessary to bring the country out of a deep economic crisis.

The French leader, who in 1976 founded a committee to campaign for buman rights in West Germany, was accompanied by Prime Minister Pierre Mauroy and seven Socialist members of his Cabinet.

A French government spokesman said before leaving Paris that he hoped West Germany's left-liberal government would respond positively to the campaign to improve labor conditions and cut

the human things. This is our way."

cept that during his soak he somehow disregarded a linden tree leaf that fell on his back, between the shoulders, leaving his perfectness open for treacherous at-tacks from behind. Before departing from Königswinter, Siegfried wrestled away the vast golden treasure of the Nibelungs from a dwarf named Alberich. It is said that the locals have been trying to even the score since.

A superior being, as the books say, ex-

### Ruined Castle

chenfels, up a street of souvenir hawkers

Now the day-trippers come, hard-working people mostly, cigarette packs rolled into the sleeves of their T-shirts, walking away from the Rhine and toward the Dra-

Dutch, drawn, it seems, by the sight of real hills, the first south of the lowlands. There is a ruined castle un top of the hill, above the dragon's cave, above a snake show, and above the hall of the Nibelungs, which, built about 70 years ago

in a spasm of nationalism, is a cross between a bunker and a mausoleum. It houses some paintings from the Siegfried leg-end, a bas-relief of Richard Wagner, and the command, chiseled in stone: "Honor Thy German Master." The way to the top is by cog railway, by donkey or on foot.

It is not possible to get lost. These days, a trail of Quench wrappers, a Germanic Kool-Aid derivative, pronounced Kvench

locally, leads straight to the top. En route, besides the dragon's cave, there are coin machines with a peep show, a fortuneteller and a shooting gallery.

Perhaps best of all, is Schloss Drachenburg, a kind of Gothic castle, built in the

last century by a baron who made money on stocks. It has been vaguely and eclecucally restored with a gilded copy of the Venus de Milo and murals that might be comfortable on the walls of a pizzeria. But it is not a boring place; just the opposite: There's something nice, something friendly, in the castle's scraggliness, its lack of earnestness or ambition.

### Rioters Destroy Government Offices in Kano

WORLD NEWS BRIEFS

LAGOS — State government offices were destroyed and officials homes looted in the northern Nigerian city of Kano when rioting broke out after the Kano state governor threatened to diamiss a local Moslem dignitary, reports reaching here said. No deaths or injuries were report-

Nigerian television reporters in Kano said in a telephone call to Lagos that the state radio station, House of Assembly, several ministries and that the state ratho statem, from the governor's official residence were damaged or destroyed in the disorders Friday. Several cars were burned. No damage was reported to Nigerian federal government offices.

The governor was out of town at a meeting, the reporters said, and the traditional Moslem ruler, the emir, remained in his palace. The Nigerian news agency said police reinforcements had been sent to Kano, 550 miles (880 kilometers) northeast of Lagos, and the reporters said the city was calm by the weekend.

#### 114 SWAPO Men Reported Killed in Angola The Associated Press

WINDHOEK, South-West Africa — South African troops struck black nationalist bases deep inside Angola last week, killing 114 guerrillas in the bloodiest week this year of the bush war in South-West Africa (Namibia), the territory's military commander announced here.

Maj. Gen. Charles Lloyd said Saturday that his men had invoided contact with Angolan forces. Angola allows guerrillas of the South-West. Africa People's Organization to launch raids into the territory to the south in their war against South African rule.

The Sunday Times of Johannesburg said Angola claimed the number of killed was 127 and Angolan soldiers were included. Angola also re-portedly claimed the South Africans had pushed 90 miles (150 kilometers) across the border. Two South African soldiers and one member of the South-West African territorial force were killed, the newspaper said.

### New Zealand Activists to Protest Rugby Tour

WELLINGTON, New Zealand — Activists opposing the South African Springboks regby tour of New Zealand announced Sunday plans for civil disobedience in a "concerted and consistent active protest." The Springboks are to acrive at Anckland next Sunday for their two month, 16-match tour.

month, to-match tour.

Pauline McKay, chairman of an anti-apartheid group that met in Wellington during the weekend, said that nationwide civil disobedience would be nonviolent — but "we are not an army and we can't issue

### Belgium Seeks to Limit 1982 Budget Deficit

BRUSSELS—The Belgian government aims to limit next year's budget deficit to 200 billion francs (35 billion), government sources said Sun-

day.

Senior ministers agreed on the target ceiling at a meeting Saturday, and Premier Mark Eyskens told reporters that spending would have to be reduced by more than 100 billion francs (\$2.5 billion). Government sources said it was decided at the meeting that the public sector borrow ing requirement next year should not exceed 12 percent of gross national product. They said the forecast GNP growth in 1982 is 7.9 percent.

Growing uncomployment and recession have shrunk tax receipts and boosted social security spending, forcing up the budget deficit and prompting disputes between the government's Socialist and Christian. prompting disputes between the government's Soci Social coelition partners on how to handle the crisis.

### Lightning Bolt Sets Oil Tanker Ablase in Italy

GENOA — At least two crew members were killed and four persons reported missing on Sunday after a lightning bolt lait a Japanese oil tanker, causing a huge explosion that sent parts of the vessel into the air. and set it ablaze, port officials said.

and set it ablaze, port officials said.

The lightning struck as the 59,000-ton Hakayoh Maru finished inloading its cargo of Algerian crude at the Multedo oil refinery port near Genoa. Witnesses said the explosion followed a clap of thunder that

shook the port and shattered the windows of nearby buildings.

Many of the 31 crew members, nearly all South Koreans, leaped into
the water and were rescued by port workers. Others were rescued from the tanker, which had been set ablaze. The fire spread quickly throughout the ship but was brought under control.

### **World Oil Glut Beginning** To Hurt Producer Nations

or out.

The net effect of these pressures has been a sharp decline in production. Industry analysts believe that Libya has dropped from 1.6 million barrels of daily exports to around 1 million since January; Algeria from 900,000 barrels to 700,000. Niceria from 2 million to 700,000; Nigeria from 2 million to possibly as low as 850,000; and Mexico from 1.1 million to 700,000

The New York-based Petroleum Intelligence Weekly estimates that total OPEC production has sunk from 25 million to about 22 million barrels a day since the begin-ning of the year. In 1979, it was almost 32 million barrels a day.

Industry analysts are talking about a surplus of more than 2 million barrels a day on the market. But this may be an exagera-tion, as spot prices have recently been rising slightly, a sign the glut may be starting to dry up.

Meanwhile, the African oil producers are desperately trying to bold the line. At a meeting in Algiers in mid-line, they pledged to keep their high prices and stand up collectively to the Sandi challenge.

Mexico has threatened France with the loss of incrative supply contracts for development projects and has even ordered French firms to withdraw their bids on them. This has spurred the French government into ordering the Com-pagnie Francaise des Pétroles to reopen negotiations for the pur-chase of Mexican oil, even if it is

Still, reports suggest the African producers are slowly yielding to market forces. Nigeria is reported to have agreed in early July to a \$2.50-a-barrel discount on a two-

### 44 Afghans Seek Political Asylum In West Germany

FRANKFURT — Forty-four Afghan refugees have applied for political asylum in West Germany after storming off a plane at Frankfurt sirport.

The Afghans, including 10 children, arrived from Britain, where they were denied entry on Wednesday, on their way back to Pakistan.

Police said during the weekend that the Afghans dashed down the gamgway in Frankfurt after 50 passengers with valid vises or West.

German passports left the animer after midnight Friday.

They were stopped by police and seat shack to the sincraft, But when they insisted they did not want to return to Karachi, they were allowed to apply for applying were allowed to apply for asym Informed sources said that he fore going to Frankfurt, the Afghans remained for 24 hours at Loudon's Heathrow airport

### is to keep increasing the U.S. de-fense budget year after year and not go up and down as in the past. Script Writers In U.S. Reach Tentative Accord

Las Angeles Times Service HOLLYWOOD — A tentative settlement has been reached in the three-month writers strike against major motion picture and televi-sion producers after writers won a guaranteed share of revenues from the growing pay-TV and home vi-deo markets.

Both sides said that settlement of the protracted strike Saturday would mean that the new autum television season may be only slightly delayed if producers imme diately accelerate production

Elated leaders of the 8,500-member Writers Guild of America hailed the proposed contract, scheduled for a ratification vote by the rank and file Tuesday, as a new standard for the industry through the rest of this century.

Writers would receive an overall 52 to 57 percent increase in mini-mums paid for scripts over the contract period. The contract is retroactive to March 1.

rical motion picture, which now brings a minimum of \$26,326, would bring \$39,955 at the end of the contract period. But, of far greater long-range importance to writers, was the accord reached over the pay-TV issue, which has sparked three strikes against the industry since last summer - first by two actors' unions and then by

### Republicans Spurn Reagan; Take Cuts To Conference Panel

By Helen Dewar Washington Paul Service
WASHINGTON — Senate Republican leaders have spurned a last-minute appeal from President Reagan to accept the House version of his spending cut plan and instead insisted on debating the nearly \$40 billion in program cut-hacks in a conference committee.

The decision Friday to buck the White House amounted to at least a tentative reassertion of congressional prerogative over economic policy, which has so far been dommated hy Mr. Reagan and his budget director, David A. Stockman. It also constituted a go-easy man, it also constituted a go-easy signal to Mr. Stockman, whose go-for-broke style of lobbying has frayed some sensitive nerves on Capitol Hill, especially in his latest effort to short-circuit the House-Senate conference on the spending "secondilation" hill reconciliation" bill

Agreeing with Mr. Reagan and Mr. Stockman that there are risks in a conference, Senate Majority Leader Howard H. Baker Jr., the Tennessee Republican, and Budget Committee Chairman Pete V. Domenici, a Republican from New Mexico, said that they conetheless believed it would produce a better

In addition, Mr. Reagan named Abraham Katz, 54, a career For-eign Service officer who has served as an assistant secretary of the Commerce Department, as repre-sentative to the Organization for Economic Cooperation and Devel-opment in Paris. The position car-ries the rank of ambassador.

Frederic L. Chapin, 52, a veteran diplomat, was nominated as ambassador to Guatemala. State Department sources said that Mr. Reagan would nominate Frank V. Ortiz Jr., 55, as ambassador to Peru. Mr. Ortiz, the highest-ranking Hispanie American in the For-cign Service, was recalled from Guatemala in June, 1980, after less than a year as ambassador, be-cause of alleged disagreement with the Carter administration policy on human rights in Central Ameri-

### Himalaya Floods Kill 6

The Associated Fress
KATMANDU, Nepal — Floods
knocked down the border bridge
on the only road between China and Nepal, sweeping away at least six persons, travelers arriving from the frontier said Sunday. The bridge, 72 miles (113 kilometers) northeast of here, collapsed Saturday night into the Bhote Kosi Rivurging that the Senate Republican leaders accept the House-passed version of the spending cuts in-stead of risking a conference stalemate or rejection of a conference compromise on the floor in the Democratic House. Mr. Slockman had lobbied hard over the last few days to get the Senate simply to accept the House bill and thus forgo a conference.

Mr. Baker submitted the issue to Republican committee chairmen and leaders, who voted 19-2 to insist on a conference. Sen. Baker then told Mr. Reagan of the decision during a meeting oo another issue at the White House and reported afterward at a news conference that the president "heartily endorsed the decision once it was

It was the second time in recent weeks that Senate Republicans rebuffed a Reagan initiative oo economic strategy. The first came when the Senate unanimously endorsed a Republican resolution reecting Mr. Reagan's main proposals for Social Security cutbacks.

#### Domenici Led Fight

But both Sens. Baker and Domenici went out of their way to downplay the dispute as "an honest disagreement on the last step of the [budget] process," as Sen. Baker put it, although Seo. Domenici made a point of publicizing his disagreement with Mr. Stockman on the conference issue.

Sources said it was Sen. Domenici, principal architect of the Senreconciliation bill, who led the fight to resist Mr. Stockman's pressure against a conference.

Reconciliation is congressional sborthand for program cuts de-signed to meet budget targets: in this case nearly \$40 hillion worth cutbacks in domestic programs to achieve a scaled-back spending target of \$695.5 billion for fiscal 1982. Even the Democratic-controlled House adopted most of Mr. Reagan's proposed cuts when conservative Democrats voted for a Reagan-backed substitute to cuts that had been proposed by House

While the House and Senate versions were "almost identical" in about 75 percent of their provisions, according to Sen. Baker, be and Sen. Domenici said the differences were important enough to merit a conference.

According to Sen. Domenici, the critical substantive differences between the two versions of the measure include Medicaid financing, food stamps and nutrition, health block grants, Conrail funding and nonhudgetary items such as radio and television deregulation.

### **Turkish Court** Jails Foreigners

court has sentenced a French doctor and ourse and an Iranian man and Lebanese woman to five months and 10 days in prison on charges of carrying Kurdish separatist propaganda, according to the semi-official Anatolian news

It said Dr. Lue Devigne and the ourse, Annick Lanter, were sen-tenced Friday in the eastern town of Diyarbakir. The Iranian, Mustafa Kemal Davudi, and the Leba-nese woman, Sahar Chamal, were sentenced the same day.

All four were detained on April 14. Police who stopped their bus in eastern Turkey said they found pro-Kurdish pamphlets, tape cassettes and maps in their possession. They were also carrying \$20,000 worth of medical supplies,

Smoke rises from a San Francisco area ravaged by a fire that caused \$3.5 million in damages.

### Blaze in San Francisco Called Biggest Since 1906

From Agency Dispatches
SAN FRANCISCO — A fire that broke out in a former bathhouse for homosexuals has destroyed or damaged 24 buildings in what the fire chief of San Francisco called the biggest blaze in the city since fires following the 1906 earthquake.

The hlaze consumed about half of a city block that the first state of the city since fires following the 1906 earthquake.

before dawn Friday, causing what officials esti-mated to be at least \$3.5 million io damage. It took 225 firefighters oearly five hours to extinguish the fire, which started about 2 a.m. No deaths were reported although firemen did not rule out the possibility that bodies might be found in the ruins.

Police said they have arrested Otis Bloom, 38, in connection with the fire. He was being held in

lieu of \$25,000 bail, hut oo charges had been filed against him. An arsoo task force is investigating the cause of the blaze.

Until recently, the structure where the fire broke out contained what was known as "The Barracks," a homosexual bathhouse. The immediate area includes several other homosexual establishments. The interior walls lacked flame-retardant covering, the fire chief said, contributing to the rapid spread of the fire, which quickly consumed a warehouse where a "sex potioo" was

The presence of the potion, a so-called stimulant oamed "Rush" that was kept in the warehose at the back of the bathhouse, made the fire's prigin suspicious, fire officials said.

### Justice-White House Links Reviewed

By Jack Nelson

Las Angeles Times Service
WASHINGTON — In the wake of irregular contacts between the White House and the Justice Department, Attorney General William French Smith has warned presidential aides in at least "two or three cases" that they violated established policy by contacting Justice Department officials oo pending criminal matters.

Both the White House and the Justice Department have written rules setting strict limits on contacts over pending cases — policies established to prevent political in-terference with the department's law enforcement duties.

Although he issued the warnings, Mr. Smith said in an interwith the Los Angeles Times that the post-Watergate era was over and that the Justice Department no longer oeed be operated as "an independent, isolated and pure bastion" free of White House influence.

At the same time, Mr. Smith said that the policies adopted hy his predecessors in the Carter and Ford administrations to insulate the department from outside influ-ANKARA - A Turkish military cance were outmoded.

"They just made a religion of it," Mr. Smith said.

### Climate Changed

"The climate in those times was that the Department of Justice had to be somehow an independent, isolated and pure bastion. Well, those times have really passed, and we really are much more collegial," Mr. Smith said, referring to the Reagan administration's practice of involving senior White House officials and others in a collective

approach to important decisions. Mr. Smith refused to identify the White House officials involved in the contacts on pending criminal matters or to discuss the nature

He said he had personally delivered the oew warning against such contacts to White House officials about a mooth ago. Since then, he

come to his attentioo. In a related indication of administration concern over the probasked oot to be quoted said that presidential counsel Fred F. Fielding recently scot a memo to presidential aides warning them to be extremely careful in their dealings with investigative, regulatory and contracting agencies when any-thing but policy matters were in-

Mr. Fielding's memo said aides would be well advised to consult with the counsel's office before making such contacts, the official

The Los Angeles Times, quoting a Justice Department official who asked not to be identified, first disclosed at least two instances of irregular cootacts between the White House and the department in a June 14 article concerning White House counselor Edwin W. Meese's powerful role at the White The officials involved in those

contacts were oot identified. For several reasons such contacts are especially sensitive for Mr. Smith. For one thing, the 62-year-old Los Angeles attorney has been President Reagan's close friend and personal attorney for more than 15 years.

Also, there has been criticism within Mr. Smith's department that he has not been an assertive attorney general and that the White House, under Mr. Meese, has maintained an unusually high level of contact with the department, exerting undne influence over department policy matters. Io the interview in his office, the

usually taciturn Mr. Smith vehe-mently denied that Mr. Meese or any other White House official had exerted undue influence over department policy. Moreover, he said be had put a stop to the unauthorized cootacts on pending cas-

"Only a very few such eases said, no more such contacts have came to my attention," Mr. Smith said, "and when I say that, I mean two or three. I have no reason to believe there bave been others, but lem, a White House official who I can't say there haven't been more.

Mr. Smith was quick to deny a published report that Mr. Meese, as well as the attorney general, had led the search that resulted in Mr. Reagan's nomination of Arizona Judge Sandra D. O'Connor to the U.S. Supreme Court.

"That was my principal responbility." Mr. Smith said.

The independence of the Justice Department has been carefully guarded by attorneys general ever since Watergate, when several Jus-tice Department officials became involved in the cover-up. And one of the prerogatives that attorneys general have protected has been the recommendation of judicial appointments to the president without interference from White House

But under Mr. Meese, the White House set up a committee to review the attorney general's recommendations, a procedure Mr. Smith says satisfied him. Mr. Meese and Mr. Smith are members of the committee, which is headed by the White House counsel, Mr. Fielding.

sources reported Sunday.

The woman was identified as
Glorisa Dincheva. Turkish authorioes said she left with her father, Zornuka Dincheva, who defected to the United States 12 years ago and reportedly is a naturalized

### **High Court's Conservative Rehnquist** Seen as a Model for Reagan Nominee

By Linda Greenhouse New York Times Service

WASHINGTON - Throughout the speculation that preceded President Reagan's selection of Sandra D. O'Connor for the Supreme Court last week, the prediction most often heard was that, regardless of gender, Mr. Reagan was looking for "another Rehnquist." Despite similarities in origins

and education — both Mrs.
O'Connor and Justice Retinquist
practiced law in Arizona and were classmates at Stanford Law School — it is too early to tell if "another Rehnquist" has been found. But there is little doubt as to what that description means.

William H. Rehnquist is a symbol. People who have trouble nam-ing all nine Supreme Court justices quickly identify him as its doctrimaire rightist anchor, the very model of a Reagan appointment. In many respects, the image is oot far off the mark. After nine and a half years, Insoce Rehnquist is the court's most predictably conserva-tive member, using his considerable intelligence, energy and verbal facility to shape the law to his vision of the proper relationship between the states and Washington, legislatures and judges, citizens and government.

#### Predictable Career

In one respect, however, the image is inaccurate. Mr. Reagan said he wants justices who "interpret" rather than "make" law. But as one of the court's creadve users some say abusers — of precedent, Justice Rehnquist has done more than his share of "law-making," in the sense of leading the court into new areas of doctrine.

Unlike Mrs. O'Coppor, Justice Rehnquist was a known quantity at the moment President Nixon nominated him to the court in 1971. As a private lawyer in Phoenix and as an assistant attorney general in the Nixon Justice Department, Justice Rehnquist often echoed the view that during the 1960s the Court had gone "too far in weakening the peace forces as against the criminal forces in this society," as Mr. Nixon put it dur-ing the 1968 presidential cam-

As head of the Justice Department's Office of Legal Counsel, he appeared 18 times before congressional committees to present the administration's views on such matters as wiretapping and ob-scenity. Little that he has said or done since becoming an associate justice at 47 has surprised observers of his earlier career.

Five years into Justice Rehnquist's tenure, the Harvard Law Review published a 64-page "pre-liminary" appraisal by Prof. David L. Shapiro, which the intervening years have borne out. On the basis of votes in hundreds of cases, the analysis concluded that "three basic propositions" guide Justice Rehnquist's work. When possible: 1) Conflicts between the individual and the government should be resolved against the individual: 2) Conflicts between state and federal authority should be resolved in favor of the states, and 3) Quesrisdictioo should be resolved against such exercise.

Last term, he wrote decisions upholding the all-male draft, rejecting a sex discrimination challenge to a California statutory rape law, and overturning a U.S. court order that had discovered and enforced specific federal rights for the mentally retarded in state insti-

### **Lurking Principles**

Part of Justice Rehnquist's influ-ence derives from his alliance with Chief Justice Warren E. Burger, who assigns him opinions in important cases, particularly those in which only persuasive advocacy can cement a majority. The two rarely part company, voting the same way this past term, for exam-

sort of one man, one cell principle lurking in the due process clause," he wrote in Bell vs. Wolfish, overruling a sweeping federal court or-der involving the constitutional rights of prisoners awaiting trial.

But there is substance to his style. He is one of the few members of the court who approaches the docket from a clearly conceived ideological perspective. When most justices seem to consider each opinion in terms of the case at hand, Justice Rehnquist sows the seeds of future opinions in cases that will embody similar issues. This approach gives a tacocal advantage to one who would move the court in a particular di-

It is in dissenting publicly from decision not to hear an appeal that Juscice Rehnquist is perhaps most revealing. Unrestrained by the need in marshal a majnrity, he can, as he did several months ago. excoriate his colleagues for allowing death sentence appeals to drag on. He makes little apparent headway with such essays, but seems to take pleasure in using the court as his own bully pulpit.

### Departure of U.S. Envoy Hailed by Afrikaans Press

By Joseph Lelyveld

JOHANNESBURG - The Afrikaans-language press of the gov-erning Nacional Party is portraying the imminent replacement of the U.S. ambassador as a step by the Reagan administration to promore closer ties with South Africa.

Ambassador William B. Edmondson, a career diplomat, coo-firmed earlier this month that he would be ending his assignment in Pretoria before the end of July after a three-year tour of duty. It had long been known in diplomatic cir-cles that the Reagan administration planned to appoint a new am-bassador and Mr. Edmondson's departure at about this time had been expected.

However, an element of controversy was injected last month into what seemed to be a routine reassignment when Die Burger, an Afrikaans newspaper in Cape Town, declared in an editorial that the Reagan administration regarded Mr. Edmondsoo as an obstacle to the improvement of its relations with South Africa. The editorial appeared a few days after a State Department mission headed by Deputy Secretary William P. Clark visited South Africa for oegotiations on the tangled issue of South-West Africa (Namibia).

#### Lack of Confidence

The oewspaper did not cite any source for its assertion about the Reagan administration's view of the ambassador, but the editorial conveyed the impression that Mr. Clark or members of his mission had expressed a lack of confidence in Mr. Edmondson in talks with Prime Minister P.W. Boths or the foreign minister, R.F. Botha. Die Burger, which is especially close to the prime minister, commented that Mr. Edmondson's continued tenure in South Africa "can serve OO DUIDOSC.

Initially, there was speculation among Western diplomats that the editorial might have the effect of prolooging the ambassador's stay. The assumption was that Washingwould want to demonstrate that it was not responding to South African pressure in making what would otherwise have been regarded as a routine move.

### Valuable Ally

But as soon as Mr. Edmond-

son's departure plans were confirmed, official sources here were quoted in the Afrikaans press as viewing the change as a harbinger of closer relations. Die Beekl, a National Party daily in Johannesburg, said it was told that the ambassador "was without doubt recalled because he is a spoke in the wheel of better relations between America and South Africa." "Because the Reagan adminis-

tration views South Africa as a potentially valuable ally against Soviet expansionism in Africa." Die Beeld's report continued, "someone else is expected to fit the oew setup better than Mr. Edmond-

The editorial commeots appeared to reflect a hope in official circles that the new ambassador will be a poblical appointee rather than a career diplomat.

Various names have been mentioned in the press here as possibil-ities, including Edmund S. Munger of the California Institute of Techoology, who has written that Americans do not sufficiently ap-preciate the capacity of the Afrikaners to promote peaceful change here; Westoo Adams, described as conservative lawyer from South Carolina who contributed to the Reagan campaign; Herman Nick-el, a senior editor of Fortune magazine: Robert Cleeves, a conservative lawyer from California; and Peter Duignan of the Hoover Institute, who has written of South Africa's strategic value to the West.

### India Rules Out Atom Inspection The Associated Press

NEW DELHI - lodia will not allow international inspection of its fifth ouclear power plant, to be built in Gujarat state in western India, the government has anoounced.

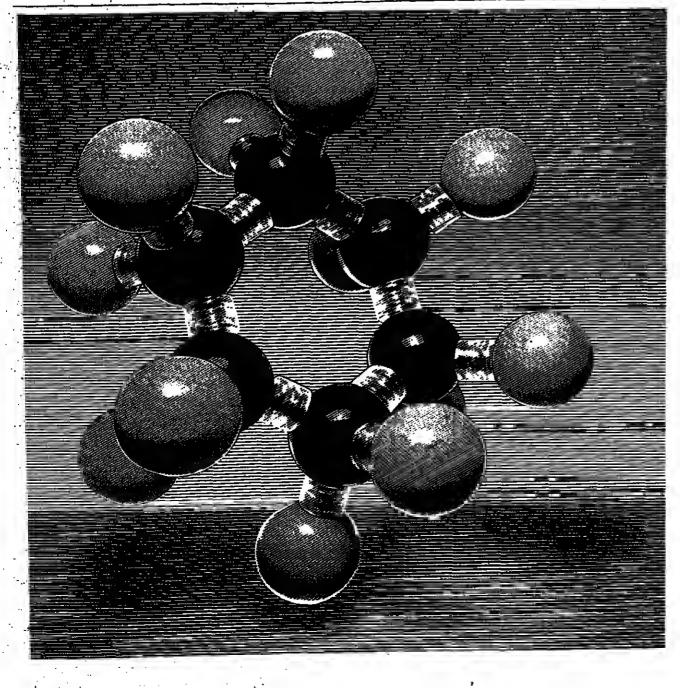

"The fuel, heavy water and technology for the proposed project would oot be dependent on any outside agencies and the reactors would be outside safeguard restrictions," an official statement said on Saturday. Of the existing four. only the ouclear plant at Tarapur is open to international inspection.

Meaowhile, a government spokesman announced that the proposed July 13-14 visit of a U.S. team to discuss ouclear issues between the two countries has been "postponed at the request of the United States." The United States uranium to the Tarapur plant.

# Issues and Answers: U.S. Policy-Makers Preview the Ottawa Summit

On July 20, President Reagan will do what many other Americans have been doing to take advantage of the dollar's value against other currencies — he will go abroad. But instead of resting, he is likely to be listening to com-plaints from leaders of the six other non-Communist industrial powers about what his administration's tight monetary policy and its consequent high interest rates are doing to their economies. France's new Socialist president, Francois Minerrand, told o European Economic Community meeting in Luxembourg that their priority should be fighting "the scourge of unemployment" rather than inflation.

In preparation for the summit of Western leaders in Canada, experts known as "sherpas" have been preparing position papers for months. Leonard Silk, economic columnist for The New York Times, discussed the issues likely to be raised in Ottawa with Mr. Reagan's "sherpu," Myer Rashish, the new undersecretary of state for economic affairs, and Richard N. Cooper, who had that role in the Carter odministration and is now a professor of economics at Harvard. Excerpts from their discussion follow:

Mr. Silk. This will be President Reagan's first summit. What do you think his first pri-

Mr. Rashish. I think the priority issue is where the economies of these seven principal industrialized countries are and appear to be going.

Mr. Cooper. I agree entirely. The European countries and, in their own quiet way, the Japa-nese, are very concerned about what they see to be the course of

It's difficult to find a time in the last 20 years when the other industrial countries have been entirely happy with U.S. economic policy. But at the present, they feel much aggrieved because it complicates their policies by its apparently exclusive focus on monetary magnitudes. The consequence of that, highly variable interest rates, pulls up the value of the dollar, or to put it the other way, pushes down the relative value of their own currencies. That forces them to maintain tighter monetary policys than they believe their domestic requirements call for.

Mr. Sik. Is there anything the president can do to accommodate these objections?

Mr. Rashish. The first observation is that a strong, dynamic, growing, noninflationary U.S. economy makes an important contribution to the economies of the other industrialized countries and to the milieu of international trade and finance in which they all work. So if we can get on a path of growth -- noninflationary growth - we expect some of the immediate problems, high interest rates in particular, to be moderated.

Secondly, I don't think it is uniquely our economic policy, and the high and volatile interest rates which have attended it, that have caused the problems for the other industrialized economies, notably France and Ger-

Mr. Silk. Dick, this is not your administration, but if you were advising it, are there things that could be done to meet the concerns of the Europeans?

Mr. Cooper. Monetary policy, now the object of animus for Europeans, is not really determined by the administration, but by the Federal Reserve Bank, responsible to the Congress. It's true, though, that some members of the Reagan administration are As to what advice I would

give, my own view is that the all-but-exclusive focus on monetary magnitudes is oonsense and potentially extremely damaging. We simply do not have at hand either the theory or the empirical information, Milton Friedman notwithstanding, that portits science, to give monetary magni-

tudes that focus. The consequences of this simple-minded theory are real interest rates which will discourage invest-ment, throttle growth and therefore ruo counter to the administratioo's stated objectives.

Mr. Rashish. Any policy car-It has other ingredients - a ries certain risks to the short term. What's important about

fiscal component and deregula-tion, designed to release the in-

the Reagan recorvery program is

that it is a thread-line policy

rather than a stop-and-go policy.

That is to say, it's for the long

term. It aims at certain structur-

al changes in the American

industry.
Mr. Silk. Pierre Trudeau, the Canadian prime minister, was just in Europe lobbying for more aid to the Third World. Robert McNamara, as one of his last acts as head of the World Bank, was very criticial of Congress for not voting funds. How important is the Third World to the

Mr. Rashish. It's unfair to say the administration has a hostile policy toward the Third World or no policy. For security reasons and just plain humanitarian reasons, concern for what is called the Third World is one of the four pillars of American for-

eign policy.

The president's budget request for fiscal '82 showed an 18-percent increase in the request for foreign aid. The president has also made a clear commitment to support the multilateral development banks and that includes funding for the International Development Asso-ciation, the World Bank affiliate which lends to the poorest countries. So far, that is proceeding well in the Congress, but it's a little like the perils of Pauline. The train has come down the track several times but the fair maiden has been rescued every time and we bope she will sur-

Mr. Silk: The Japanese would oot regard the United States as a model of liberal trade principles following the auto import quota decision. Was that an exception?

Mr. Rashish. I absolutely regard it as an exception to the major thrust of policy, a very painful one at that. The Reagan administration, in the main line of policies pursued by every administration since the end of World War II, has a very strong commitment to liberal trade. Last week, President Reagan decided not to renew a four-yearold import quote on Korean and Taiwanese shoes.

Mr. Silk. Yet the Reagan administration policy is importing more oil and burning more oil.

Mr. Cooper. The Reagan administration is against reducing imports but that it has focused on one way to do it. That is to stimulate supply in the United States, which is landatory but not enough. I find it appalling that the administration has abandoned so many other aspects of energy policy — conservation guidelines, research and development expenditure on almost anything but the breeder reactor, big cutbacks for the syn-

Mr. Rashish. As our dear. friend, the professor of economics knows, prices tend to operate policy tends to induce supply, conserve demand and induce substitution and conservation in terms of technological change.

Mr. Silk. On another trade and security issue, the administration seems to be moving against U.S.-Soviet trade, with the exception of the grain sales. Western Europe is increasingly involved in East-West trade. Is that a fit topic for summitry and would the United States press its allies to reduce trade with the

Mr. Rashish I don't accept your characterization of the Reagan administration policy as aimed at reducing trade with the Soviet Union — it's just not so. I do accept that it is a fit subject for summitry. So fit that the United States proposed it to be put oo the agenda for the Ottawa summit, and it was put on the agenda in mid-February at the first meeting of the summit preparers, the sherpas. We started with the proposition that the issue is not simply whether we. should increase or reduce trade ognized that we ought to have

economic relations with the East that are parallel to our general foreign policy and that we cannot conduct a rational policy except on an alliance basis. Given
those two premises, we tried to
discriminate among cases.
Mr. Silk. The undersecretary

of the Treasury for monetary af-fairs, Beryl Sprinkel, has called for a policy that would be even freer floating with less support for currency values is that the

administration's position?

Mr. Rashish. The larger question is whether the poincy we've had for a relatively short interval for active intervention in foreign exchanges has in fact affected in any substantial degree the path of exchange rates.

There's a knew perception that

regular intervention by the cen-tral banks in a handful of comtries is not likely to have much impact on the course of exchange rates. The policy entiricated by Beryl Sprinkel was not 100 percent laisses faire. It said there were exceptional circumstances in which intervention would be appropriate, but as a general rule it was meffectual

Mr. Silk. Was that a symmetrwir. Sink. Was that a symmetrical policy statement, that we would not intervene when the dollar was strengthening or when it was falling?

Mr. Rankish I assume the policy is one tor all seasons.

I'll give you a good question. Is this summit going to be different from the last? Do you expect any concrete results to emerge?
Mr. Sik. All right, I ask that.

Mr. Rashish. The answer is that consciously, this summit is going to be different. While the last few summits tended to produce agreement on specific un-dertakings — this summit will

### Vanuatu Moving Forward in Its Bid for a UN Seat

By Bernard D. Nossiter

New York Times Service
UNITED NATIONS, N.Y. — Vanuatu, a chain of 70-odd South Pacific islands, 150,000 acres of coconut palms and only 120,000 people, has taken its first step toward coming the 155th member of the United Nations.

The Security Council approved its application last week. The Vanuatu government of Prime Minister Walter Lini, an Anglican priest, hopes that UN membership will heal the deep cultural division caused by 74 years of joint British

Until Vanuatu gained independence last July, Paris and London ruled the archipelago, formerly the New Hebrides. The British-French condominium set up two of every-thing on the islands: school sysolice forces, courts. guages, currencies and more.

Barak Sope, the secretary of Vanuatu's Foreign Ministry and lege degree, has been in New York tu is scheduled to take its seat in to shepherd his new nation's applitude General Assembly on Sept. 15,

cation through the Security Council. In an interview, he said: "We've had problems with this condominium legacy. Now nation-building is our first, primary aim."

The joint but separate rule, he said, created an "artificial division" among his people. "France and Britain each tried to inculcate their culture, like a religion. This created a problem of communication between people, between those who went to French and those who went to British schools

UN membership, he said, would help unify his people. It would also reduce their sense of isolation the chain lies 1,200 miles (1,920 kilometers) northeast of Brisbane, Australia - and "give us contact with big powers as well as the Third World."

the flow of UN aid to the islands. "Once we become a member, things will move faster, like ecoone of only 20 islanders with a col-nomie aid," Mr. Sope said. Vanuawhen that body approves the Security Council's recommendation for membership.

The islanders do not want steel mills, big airports or heavy indus-try. They have received \$735,400

### **Marchers Back Nyerere Policies**

DAR ES SALAAM, Tanzania — Thousands of persons marched through the streets here Sunday in the latest public demonstration of commitment to Tanzania's Socialist policies and to denounce interference by the International Mooetary Fund in the nation's economy.

Tanzania, which is facing its most difficult economic period. has in recent years become increasingly dependent on foreign aid. It is at loggerheads with the IMF which in return for a substantial loan, is demanding that Tanzania make a series of economic reforms, including a 50 percent devaluation

so far this year from the UN Development Program, largely for technical aid to improve and diversify their agriculture. Copra, or dried cocoout meat, is the biggest export. Vanuam wants help to replant 70-year-old palms, build a palm oil industry, modernize tuna fishing, replant denuded forests and strengthen cattle trising.

Village Life

Mr. Sope, 30, said his government would resist any economic development that disturbed Vanu-atu's village life. "We don't want production that takes people away from the villages, that breaks up our social system," be said.

In a Melanesian dialect, Vanuatu means, "Our land that was ours, is oow and will be in the future."

The higgest current aid givers are the former rulers, and the rreach pose a problem Mr. Sope said that about \$5 million of the \$8 millioo France now gives, a hig amount in an economy of about \$200 million, is tied to French schools. He fears that Paris may take away this sum if Vanuatu

goes forward, as it will, with a single school system, even one teaching both French and English.

Shortly before Vanuatu became independent, an attempt was made to split off one island, Espiritu Santo, as an independent tax haven for rightist Americans and French planters. But with the help of troops from Papua New Guinea, the revolt was put down and its leader, Jimmy Stevens, is in jail.

Tourism is Vanuatu's third higgest earner of foreign exchange, after copra and fish. But Mr. Sope said his government would not ermit tourism to expand.

"When you do tourism, you build infrastructure for outsiders,"
Mr. Sope said, "You get social
problems. Our people think all
white men are rich. Things like prostitution develop. We don't want to be a nation of busboys and

intervened in Cambodia not because of threats to its security but in order to impose its hegemony over a neighbor." The diplomatsaid the meeting would turn world: attention once again to the unset-tied Cambools problem and take it off the back burner to pur it-ou the front burner."

U.S. officials support this view and argue that the meeting will also underline a continuing UN. concern with the troubled country.

### Interest on Haig

Much interest will be directed toward Mr. Haig, who on Monday will be making his first appearance at the United Nations.

The deposed Cambodian regime Pol Pot and its chief supplier of arms, China, oppose extending an invitation to Heng. Samrin who, backed by Vietnamese guns, re-placed Pol Pot in 1979. More important, China and the Pol Pot forces oppose two points in a dec-laration that the conference is expected to adopt.

Among other things, the declaration will call for disarming all Cambodian factions and for setting up an interim government while the United Nations supervises elections. However, the Pol Pot forces, with China's support, want to enter Phnom Penh with

this point, and that no specific

projects could be detailed until dis-

cussions with potential recipients

monetary commitments and considerable skepticism among many critics, Canadian External Affairs

Minister Mark MacQuigan said

that he had no trouble endorsing

what has been done thus far as a "positive step forward." Mr. Haig

also cautioned against too much

cynicism, saying that the fact of the meeting — the first of its kind at a "high political level" — was in itself a good sign.

Although development plans for the Caribbean basin have been

tried before without much success,

the start on this one represents at least a preliminary political victory for the Reagan administration,

The new administration wants to show that it understands that economic and social factors under-

which called for the meeting.

The Southeast Asian group is especially cheered by the appearance of such important nations professing nonslignment as Yugoslavia Senegal and Nigeria. The fact that 16 foreign ministers are attending is also regarded as a sign of

But the Soviet side notes that the total falls short of the 97 that voted to hold the conference last winter. Moreover, six of the countries are coming as observers. Among the 25 declining is India, as well as nations that invariably vote with Moscow.

### China Comments

PEKING (NYT) - China has esserted that Vietnam's refusal to attend the UN conference on Cambodia supported the view that Hanoi's 200,000 troops there must be driven out by force. "Stability can be attained only by fighting for it," a commentary commentary distributed Saturday by the Chi-nese news agency said.

### India Is Said to Kill 5 Pakistani Soldiers

NEW DELHI — Indian troops killed five Pakistani soldiera durinitial live Pakistani soldiers during an exchange of fire across the border in northwest India, the Press Trust of India news agency reported Sunday.

The agency said the exchange took place Saturday after Pakistani soldiers fired without previocation. It also quoted unidentified military analysis as anything that

military analysis as saying that Pakistan had deployed 350,000 troops along its border with India.

# Greece Avoids Yugoslav-Albanian Rift

New York Times Service ATHENS - The Greek government is rebuffing attempts by neighboring Yugoslavia and Al-bania to embroil it in their dispute over the Albanian minority in Yugoslavia's autonomous province of

The Greeks, refusing to take sides, are warning the two Communist-ruled countries that their dispute could open the way to Soviet intervention in the area.

ment approach without military "Greece doesn't want involve-ment in this dispute," Foreign Minister Constantine Mitsotakis Furthermore, it said that "donor said. "We don't want Albania and countries must be free to choose Yugoslavia to get us involved in the countries with which they cotheir differences and neither do we operate and the ways they can best want third parties to interfere in the area.

Premier George Rallis said recently that Greece was "against any attempt to disturb the crafus quo in the aren. The statement was seen as sup-

porting Yugoslavia's contention that Albania was formenting trouble in Kosovo, the scene of wide nationalist disorders a few months ago. But the deeper Greek lear is that any extension of the dispute would swaken passions among the many minorities in Yugoslavia.

The Greeks do not hide their awareness that Yngoclavia is trying to draw them into the dispute by depicting Albania as a common threat with expansionist ambitions. But the isolationist rulers of Albania, while trying to allay Greek suspicions, made mayters worse through a blunder that turned Greek public sentiment

against them. The controversy began in May when Yugoslavia made public an Albenian-origin man indicating that Tirana had claims to 3 "Greater Albania," involving teiritories running ucep into Yuguslavia and Greece.

Greek intelligence determined that the map was produced in 1971 by exiled Albanians in the West. Albania hastened to accuse Yugoslavia of seeking to undermine Greek-Albanian relations. A document by its embeasy in Athens gave assurances that Alberts had no territorial claims on Greece. But the embeasy also said that the baddless and that the

healthy sections of Greek public opinion know that the so-called Northern Epirus issue is long dead and has no future." The statement provoked an outery from nationalist groups in

Greece, who say that parts of southern Albania are Greek; with i. Greek ethnic minority of 300,000 reportedly suffering atrouvier and discrimination. They call the area Northern Epirus.

These organizations accused Timm of holding 20,000 ethnic Greeks in prisons or concentration

WULENSL Ghans - A barwollensi, chang — A barroom brawl was the spark for the
explosion of ribal fighting in
northeastern Ghana last month in
which hundreds of people died and
an estimated 20,000 were made

Witnesses in this village 175 miles (280 kilometers) north of Accra said that warriors of the Kon-komba tribe stormed in just after dawn on June 21, killing more than 500 members of the rival Nanumba tribe with guns, arrows and cutlasses, and burning down

Sanitation workers said they had buried 520 hodies of men, women and children. Police and troops who moved in to put down the fighting said that a further 200 to 300 people might have died in 300 people might have died in neighboring villages. In Accra, four members of Par-

fiament who visited the area told the house that 1,500 people may have been killed and several hun-dred may have been injured. The legislators said they had counted 27 villages destroyed.
Their report said that Konkom-

has from across the border in Togo may have participated in the fighting, and it urged surveillance of the frontier. It also called for an increase in military and police presence in the area.

work their farms or travel without army protection. This situation could lead to famine next year because the planting of yards, the staple root crop of Ghana, has been disrupted.

The government has declared the region a disaster area, set up a national committee to coordinate relief work and banned the carrying of arms, the Ghana news agency said. President Hilla Limann scheduled a visit to the area to try to restore calm.

The trouble started to late April, according to the agency, with a brawl in a beer bar between two men, a Nammba and a Konkosnba, in the Nanumba district capi-tal, Bimbila. Some reports said the

### French Confirm Case Of Legion's Disease

The Associated Press PARIS - French medical authorities say they have identified one confirmed and at least threesuspected cases of the pulmonary infection known as Legionnaires

The medical authorities said Saturday that the afflicted patient was being treated at Bichat Hospital in northern Paris. No details on the patient's identity or condition were given. The disease first came to medical attention in 1976 when it caused the deaths of 29 persons who had artended an American Legion meeting in Philadelphia.

fight, which involved the son of the local Nanumba chief, was over a

The fight brought a simmering intratribal rivalry to a boil. In re-cent years, educated Konkomba have claimed that the rights of have claimed that the rights of their seminomadic tribe are infr-inged by the Nanumba, who claim a right to appoint chiefa to Konkomba villages and to extract trib-ute in the form of unpaid labor

**Grievance Over Traditions** The Nanumba allege that their customs and traditions have been

violated by Konkomba who have settled in their areas. The fighting that began in Bim-

bila spread rapidly through the area, culminating in the Wulensi More than two weeks after the

attack on Wulensi, the stench of death still hung over the village. Heavy rains had undone the work of the gravediggers. The head and shoulders of a decomposing body protruded from a shallow grave in the main street.

The village was almost deserted, the Nanumba who had survived the attack having fled into the bush. A few refugees had returned under military escort to salvage what they could from the ruins of their huts while some Konkomba women searched for anything of value left by the fleeing villagers.

At the tiny police station a chicken picked its way among the blood-soaked clothing of the 100 or so people who died after seeking refuge within its walls. Witnesses said that the Konkomba agreed to respect the sanctuary of the police station until one of those who had fled there opened fire on them.

Police who were there at the time said that there had been only 10 officers in Wulensi when it was

No Amenunition

They said that transport and communications problems, serious throughout Ghana, had made it difficult to control the fighting. Army reinforcements requested the evening before the attack had taken 36 hours to arrive from Tamale, 100 miles away, they said, while paramilitary police who drove up in an armored car at the height of the fighting had no ammunition.

The army did protect Bimbila from attack by surrounding tribes-

Although no fighting has been eported since June 23 and the tribes are observing a truce monitored by the army, civil servants who fled Bimbila have not re-

The town's streets teem with refby their absence. One doctor using a Health Ministry van arrived 10 days after the fighting stopped.

### Officials in California Fear Use of Pesticide

The Associated Press

SAN JOSE, Calif. — Some officials in an area stricken by Mediterranean fruit flies have urged residents to leave, as officials prepared to battle the bugs with aerial spraying of a controversial

Barring the issuance of a court injunction sought by officials in Northern California, helicopters are to begin aerial spraying of malathion early Tuesday. The spraying program was ordered by Gov. Edmund G. Brown Jr. after the U.S. Department of Agriculture threatened a quarantine on California produce.

The 97-square-mile area of the infestation will be sprayed with malathion at least six times, with the applications coming seven to 10 days apart, officials said.

The first application is expected to take a week and the rest two to three days each, officials said. The first "target area" is a 15square mile section near Stanford University.
However, U.S. Agriculture Secretary John R. Block warned that

spraying might not be enough to halt the pests, and said he still might have to impose a quarantine on 200 fruits and vegetables grown in California. That could mean short supplies and high prices nationwide. The crops were valued at 54.1 billion last year. State agriculture officials, while institute that the chemical posed to be all thems. posed no health threat, urged residents to stay inside, cover their cars and bring children's toys inside during the 2 a.m. to 6 a.m.

Some local officials urged residents to flee rather than face the

possible danger of malathion.

"I don't know where I'll go but I intend to leave," said Zoe Lofgren, the Santa Clara County supervisor. A Sunnyvale city councilman, Larry Stone, predicted that "an exodus will create incredible security problems; the area will be open to every residential humbrily problems. dential burglar if people leave, and many will."

Meanwhile, tens of thousands of residents in a 620-square mile area around Mountain View already under quarantine worked to strip the trees in their yards as pesticides were sprayed from the ground. Those who have not stripped their trees by Monday will be subect to citations carrying possible six-month jail terms and

A woman carrying a baby joined other protesters outside the state Capitol in Sacramento to express opposition to plans to spray trees in their neighborhoods with a pesticide.

### U.S. Withheld Report on Benefits of Legal Abortion

By Victor Cohn ington Post Service

WASHINGTON — Legalized abortions have reduced abortionrelated disease and death among American women and have reduced the incidence of teen-age marriages and out-of-wedlock births significantly, according to a never-delivered statement from a federal Center for Disease Control

The 11-page statement, prepared by Dr. Willard Cates Jr., chief of abortion surveillance at the center in Atlanta, was to have been given as testimony May 20 before a Senate Judiciary subcommittee,

But his superiors, including Richard S. Schweiker, the Health and Human Services secretary, de-

### Alcohol Poison Toll Rises to 325 in India

NEW DELHI — The death toll in one of the world's worst illicit liquor poisoning disasters has risen to 325 with the deaths of two more persons in India's southern state of Karnataka.

The Press Trust of India said agees, and food is running critical- Saturday that one person died in ly low. Relief workers are notable the state capital of Bangalore and by their absence. One doctor using another in the town of Mysore. Scores of people are still being treated in hospitals. sented a three-page report omitting most of the favorable effects of legalized abortion described by Dr.

Mr. Schweiker is an opponent of abortion and a longtime advocate of a constitutional amendment to prohibit the procedure, as are his two top health officials, Dr. Edward Brandt, the assistant secre-tary, and Dr. C. Everett Koop, the deputy assistant secretary. Dr. Koop also is Mr. Schweiker's choice for surgeon general, a position that would put him in charge of programs administered by the

#### Decline in Illness

Dr. Cates' statement would have been given to the subcommittee, which, in an anti-abortion vote Thursday, said human life starts at conception. In the statement, Dr. Cates said that legal abortions have produced a dramatic decline in abortion-related illnesses and have created new means of "convenient, low-cost delivery of outpatient health services" to women. He also quoted data showing: In 1965, when abortions were

illegal everywhere in the United States, there were 235 abortion-related deaths nationally, 20 percent of all pregnancy-related deaths, and "it was not unusual for half of

cided to replace Dr. Cates at the hearing with another center official, Dr. Carl W. Tyler, who pretions" of illegal abortions. In 1976, three years after the Supreme Court decision legalizing abortion, there were two abortion-related deaths.

 Advances in surgical methods have made abortion safer than childbirth. "The risk of dying from induced abortion during the first 15 weeks [of pregnancy] is one-sev-enth the risk of dying from preg-nancy and childbirth."

 Legal abortion has helped produce significant declines in "high-risk marriages" teen-agers' that often produce unwanted children and has been associated with a decline in out-of-wedlock births in some states. The highest teenage child-bearing rates occur in states with the lowest abortion rates, the statement said.

 The availability of amniocentesis — examination of the fetus during pregnancy - and abortion if the fetus is deformed apparently has led to 10 percent more child-bearing, rather than less child-

U.K. Consulate Bombed The Associated Press

### Favorable Impact Seen

Dr. Cates' statement concluded that legal abortions have had an important and largely favorable public health impact and that making abortions illegal would result in "a predictable increase in illness and disease of American

The decision to replace Dr. Cates with Dr. Tyler was made in "the office of the secretary," some Health and Human Services sources said late last week.

Dr. William Foege, the center director, acknowledged that he talked to "quite a few people," including the secretary and people in his office, "and he either approved or concurred." But Dr. Foege said that the change in officials "was my recommendation and not something someone else asked me

Some sources said that top cen-ter officials feared that Dr. Cates' testimony before anti-abortion senators might have an adverse effect on the Center for Disease Control or its data-gathering, but Dr. Foege maintained that the recommendation had nothing to do with any such fears or with any center policy.

**Brain Chemical** The test indirectly measures a brain chemical called serontonin, one of numerous "chemical mes-

sengers" that transmit impulses from one nerve cell to the next. Although serontonin itself is fleeting, it leaves behind a sort of fingerprint or marker — its metabolite or end product, a chemical called 5-HIAA. It is this 5-HIAA that can be detected in cerebrospinal fluid taken by lumbar puncture (a spinal tap) a few inches below the end of the spinal cord.

The chemical does not fluctuate from day to day, according to

### Cuba Captures **Alleged Plotters**

linska Institute in Stockholm.

than in women.

The relationship between low 5 HIAA and a high suicide risk is the most powerful association I'm aware of between a biological marker and a behavior." said Dr Frederick K. Goodwin, chief of the National Institute of Mental

Health's clinical psychobiology branch of research. Dr. Goodwin and Dr. Gerald L. Brown of the NIMH and Dr. Marie Asberg of the Karolinska Institute - logether and separately have conducted studies during the last five years that clearly establish

#### Swedish Studies

The NIMH team had been intrigued by an earlier study in which they found a connection between impulsive, aggressive behav-ior in a group of Navy enlisted men and levels of certain brain chemicals. Aggression and low 5-HIAA (and thus low serontonin) seemed to go hand in hand in these men. But the researchers also noticed, almost accidentally, that 82 percent of the men in the low 5-HIAA group had attempted suicide — nine times the number who did so in the group with high lev-

Meanwhile in Sweden, Dr. Asberg, who had first reported the association between low serontonin and snicide, demonstrated not only that serontonin's end product, 5-HIAA, was lower in those who attempted sincide than in others, but was especially likely to be low in those who chose violent methods and also in those who were were successful in suicide.

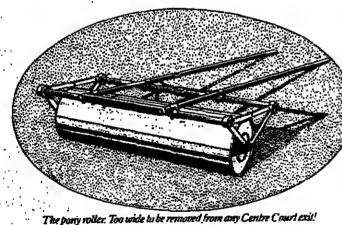

Men tend to choose more violent and effective means of suicide, such as shooting, hanging or drowning, while women resort to pills or mild wrist-slashing and are more likely to be unsuccessful.

The strongest and most recent evidence comes from Swedish studies that followed up a group of suicide attempters, Dr. Goodwin said. The NIMH is cooperating in the studies.

After a year, only 2 percent of the patients admitted to a hospital intensive care ward after a suicide attempt had succeeded in killing themselves. But 22 percent of another group of patients, who had been seen in a psychiatric unit and found to have low 5-HIAA, had killed themselves.

Dr. Goodwin said that clinical trials are under way with a new anti-depressant drug called zimelidine that slows the normal destruction of serontonin in the nerve cell, Other approaches center on substances that increase the production of serontonin. Depressed patients with low 5-HIAA often fail to improve on conventional antidepressants.

# Everyone at Wimbledon now uses a Rolex

It is rumoured that The Championships of The All England Lawn Tennis and Croquet Club were started in order to raise funds for the repair of the Club's pony roller. The roller at that time was used to maintain the croquet lawns.

What is certainly true is that, on Monday, 9th July, 1877, the 22 entrants assembled at the Wimbledon courts in Worple Road for the Men's Singles Championship (the only event).

From such inauspicious beginnings developed the most prestigious tennis championships in the world. The championship every player dreams of winning; then dreams of winning again.

In those far-off days of the early 1870s much was done to popularise the new game by a Major Wingfield who offered for sale a

boxed version of the game. It was marketed under the unlikely name of "Sphairistike."

At various country houses up and down Britain, croquet rapidly went "out" and lawn tennis or "sticky", as it was

nicknamed, was "in."

Thus, those first Wimbledon Championships were a natural reaction to a fast-growing game that was virtually unheard of ten years before.

Yet that first pioneer committee did far, far more than simply set up a tennis tournament.

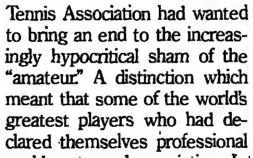

For the first time, the size and shape of the court; the position of the service lines together with the height of the net were set down in writing. Except for minor adjustments over the next three years, these dimensions remain the same today

But many would say that the committee's champion in the '20s and '30s. greatest achievement was the new scoring system. (Previously the racquets method of scoring was used.)

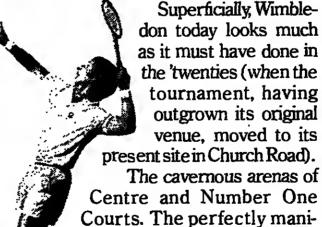

This system brought periods of heightened tension and points of high drama to the game. And no-one has ever improved on it.

In modern times, The All England Club did much to bring about open tennis in the late sixties.

For some time both The All England Club committee and the Lawn

could not, under existing International Lawn Tennis Federation rules, compete at Wimbledon. Finally, the I.L.T.F. yielded to British pressure and Wimbledon became truly open once more in 1968.

cured grass. The strawberries and cream. Yet while Wimbledon has always been very conscious of its traditions, it has always

The Australian master, Red Lang reacted quickly and progressively to the ever-evolving needs of the game, the players and spectators.

And times have changed at Wimbledon. The Rolex Watch Company of Geneva have been asked to replace and update the entire Wimbledon timekeeping system. Throughout the grounds, 22 clocks have been replaced. On court, digital clocks inform

spectators of both the time and the duration of the match. The entire system is controlled to an extreme degree of accuracy by radio signals transmitted from Geneva.

But not only spectators rely Changing times at Wimbledon, on Rolex for perfect timing. Many of the world's top players choose a Rolex Oyster as their personal timepiece.

Its tough, rugged construction (it takes 162 separate operations to carve an Oyster case from a single block of metal) provides more than adequate protection for its pre-

cision movement against the power and controlled violence of the modern game.

One thing about Wimbledon, however, will never change. The winner on the day will be the player with the determination, strength, and ROLEX immaculate timing.

The Role a Date most Chromometer, In 1864 gold, steel and gold combination or stainless steel, with matching bracels

Page 6 Monday, July 13, 1981

### **Atlantic Common Sense**

policy can be heard even inside the Reagan administration. The president's own officials complain that they cannot drive the anti-Communist bus if friendly passengers aren't told its destination.

Not just the fainthearted, in other words, want a plan for arms negotiations and a concept of coexistence. But Reagan still resists. "Basically." he said the other day, "good foreign policy is the use of good common sense in dealing with friends and potential adversaries. We know where we're going and think it might be counterproductive to make a speech about it."

Translation: I don't need speeches to prove I understand diplomacy. I'm building up America's economy and military, and shopping for partners all around the Soviet Union. Let the Russians sweat. When we finally begin discussing arms control and trade, I'll know what I want and be in a stronger position to get it.

Yet the very next day a senior State Department official offered the obvious demurral: We know where we're going, but the allies do not, or at least cannot persuade their people that we do. So "we have a problem of some proportions" and need to be "more articulate" in explaining our course toward the Soviet Union.

Translation: Europeans are frightened by a president whose words and preoccupation with weapons point only toward East-West confrontations. They, too, have priorities, which make them resist pressure for military buildups and nuclear weapons from an America that seems uninterested in arms control. If the United States doesn't demonstrate some purpose and finesse, they will set off on their own paths to Moscow.

If Secretary Haig will not be allowed to define America's direction, the more imperative that Reagan take on the task.

Keeping the Kremlin guessing about

Now the despairing cry for a U.S. Soviet American intentions is dangerous. It enlarges the risk that the Soviet leaders will miscalculate the odds on SALT as they design new weapons, or misread Western reactions to their conduct in Poland. And if they guess wrong about U.S. motives, the United States in turn will surely misread theirs. In nuclear chess, all the pieces had best be visible.

> Sweating the Russians might be fun if it didn't make the rest of the world perspire, too. The West Europeans have shouted for months that politically they cannot accept new nuclear weapons if their people can see no end to the arms race. The less developed nations cannot forever resist the spread of nuclear weapons if the nuclear powers make no progress in reducing their own arsenals.

> Moreover, other nations have higher priorities than containing Soviet power. They will work with America only to the extent that it works with them. Anti-Soviet coalitions in the Middle East will not survive a deadlock in Arab-Israeli diplomacy. Arms sales to Pakistan and China will achieve little if they create new openings for Moscow in India. The idea that Communism is a greater threat than racism or feudalism is not self-evident to Africans or Central Americans.

No amount of military or economic power will impress allies, or adversaries, unless they believe that it will be used to address their insecurities as well as America's. The Russians need to know the price of future trade with the West and the kind of arms control Reagan envisions. The allies need to know his plan for preserving a stable Europe. The poor nations need to know what America offers that Moscow doesn't.

To boast of common sense is not to define a common purpose. Mistrust of the Soviet Union creates no basis even for an adversary relationship. Reagan does need more than a speech. He needs a sturdy web of policy.

THE NEW YORK TIMES.

### **Washington Nonsense**

It may be the most preposterous news of the century: "A Senate subcommittee Thursday decided, by a 3-to-2 party-line vote, that human life begins at conception ... " Well, we thought, thank God the five of them finally made up their minds. What greater authorities could one ask for on this matter, after all, than the members of the subcommittee on the separation of powers of the U.S. Senate? And what more appropriate way to decide such an issue than by an up-or-down vote of five politicians? As the fellow said, only in America.

It did occur to us that there is a certain contradiction in the position of those who have been advocating such a finding by the U.S. Congress. For in those few hours of the day when they are not seeking to guarantee that the human fetus will enjoy all the legal rights of a human being, they are seeking to guarantee that human beings will enjoy as few rights as possible. This lobby is not exactly what you would call a great civil, human or legal rights crowd. They may be terrific on getting you born, but once you're born it seems as though the first thing they want to do is unplug your television and lift your passport.

The legislative vehicle of this theological finding is something that has been nicknamed the human life bill. It is the handiwork of Sen. John East of North Carolina, who was sent by the Lord (we decided this by a 4-to-3 vote) to make Sen. Jesse Helms look liberal. His bill is intended to circumvent the Supreme Court's 1973 finding that a variety of anti-abortion laws then existing were not constitutional. It is terrible legislation, and even some of those who favor a constitutional amendment banning abortion think so. What is good about it is that it serves as an illustration of how absolutely out of line how far beyond their competence, expertise and authority - America's secular politicians are getting in their efforts to make law on this question.

That brings us to what may have been the second silliest argument of the week: that concerning the abortion credentials (we can think of no other way to put it) of Sandra Day O'Connor to serve on the Supreme Court. Consistency does not seem to be an excessive burden on those fighting her on these grounds. First it is argued that what is wanted in a Supreme Court justice is, above all, a penchant for merely interpreting and applying the law, as distinct from making it; in the next breath it is earnestly argued that Mrs. O'Connor should be made to commit herself to a policy position on abortion. This last, of course, has everything to do with making law and much less to do with application of interpretation of the rest of that modest mandate that goes by the name of strict constructionism.

We cannot say that the anti-anti-abortion forces, commenting on this, have been a lot more helpful. The whole argument is askew, about the wrong thing - too much on political result, not enough on how and why that result was reached. It avails little insight into the woman's qualifications, thinking or prospective temper as a jurist. Her so-called 'pro-abortion" choices in the past may well have represented a very conservative reading of the law and of the permissible reach of politicians. Tell us whether that's liberal or conservative, pro- or anti-abortion, good or

bad for human life. We think Mr. Reagan has probably got himself a conservative jurist. Maybe it's time for some redefinitions. Will someone please explain how this currently noisy, politically weird and truly far-out group of people pressing for ever more involvement by an allpowerful state in American citizens' private lives and private choices got to be called "conservative" in the first place?

THE WASHINGTON POST.

### International Opinion

### Social Policy and the Riots

Faults in policing are not the root cause of violence, though they may sometimes be the trigger. Britain's inner cities are now slipping into the crisis America suffered in the sixties. We have been expecting it for years, and now it has come. It may be weaker, more spasmodic, different, but it is not to be neglected. Specifically, it is not a time for central government to be starving inner cities of funds in favor of the shire counties.

- From The Observer (London).

Faced with the worst social crisis this country has suffered since World War II, the

government does not know what to do. This is not surprising. Just as there is no simple diagnosis of the causes of the riots, sub-riots, lootings and destruction that have swept several cities, there are no simple solutions. The government feels it must do something. The danger is that, in the urge for decisive action of any kind, it will do the wrong thing.

It would be a good thing if Mrs. Thatcher could demonstrate a little compassionate social insight. The great risk to farsighted statesmanship is posed by doing to Liverpool, Manchester and Brixton what was done for a generation to Northern Ireland: pretending that it is only "their" problem out there, not ours, all of ours, here and now.

- From The Sunday Times (London).

### In the International Edition

#### Seventy-Five Years Ago July 13, 1906

CARLSBAD, Germany — Prince Alexis Orloff, who arrived here a few days ago to take the cure, received a telegram from Russia last night informing him that the famous Orloff stud of horses has been completely burnt and destroyed and his estate ruined by the peasants. In St. Petersburg the forthcoming visit of the British fleet is calling forth some opposition on the part of a section of the press, which affects to see in the event an attempt to give moral support to the government in its fight with the Duma. The more intelligent class of Russians, however, welcome the signs of an era of better feeling between England and their own country.

### Fifty Years Ago July 13, 1931

PARIS - With the specter of bankruptcy hovering dangerously close to the front door of the Reichsbank, attention of world capitals yesterday was focused on the German situation and its possible implications on the war-debt moratorium. In Berlin the cabinet was in session all day, considering a drastic decree to cut off all credits and stop expatriation of capital. In France Premier Laval cut short his vacation to hurry to Paris, where he conferred with the German ambassador. The Darmstädter und Nationalbank, one of the biggest banks, is closing its doors this morning. An emergency decree by President von Hindenburg is to guarantee all deposits.

### Foreign Policy: A Welcome Start

PARIS — There now is an American foreign policy. At least, there is an American policy toward the Soviet Un-ion. It is a very little policy, only a beginning. It may not even be a sincere policy. But it is a relief after the void which ex-

Secretary of State Alexander Haig is said to have informed Soviet Ambassa-dor Anatoli Dobryoin that Washington would consider the Soviet Union's "response to international proposals for re-solving the Afghanistan and Cambodian problems" as a test of future relations. It said that a constructive response would significantly improve relations be-tween Washington and Moscow.

For six months, the Reagan administration has offered verbal abuse of the Soviet government while indefinitely deferring negotiations and providing no comment on what Moscow might do to change things for the better, other than to cease to be a Leninist and professedly revolutionary power. Critics of the administration even now suggest that the new U.S. stance is meant merely to justify further delay in arms negotiations.

Yet it seems not to have been grasped in Washington how destructive the effects of its refusal to talk to Moscow have begun to be upon the alliance.

The new men of this administration had correctly understood when they took office that a show of firmness was necessary. The Soviet Union had to be given a demonstration that the new administration condemned what Moscow has done in Afghanistan and Africa, and that it would oppose what Washington assumed (correctly or not) that the Russians would like to do in the Gulf.

So they started out by "sending signals," as the strategists put it, of resolu-tion and disapproval. But the signals produced affect without content; they expressed hostility without intelligibly communicating what could be done to resolve it. As a result, they eventually had the opposite effect of that intended. They drove the Soviet government

A Veteran's Fiction

In Honor of Honor

By R. James Woolsey

Washington and contributing editor to the Armed Forces Journal.

WASHINGTON — A new novel, "A Sense of Honor," uses an

break apart one's comfortably monochromatic view of the 1960s

into different-hued, overlapping, strangely focused components.

As a novelist and as a man, James Webb is not your passive aesthete without a point of view. He recently told the Reagan

administration, which was courting him to bead the Veterans Administration, that his terms were independence and direct access

to the president to argue the case for his fellow Vietnam veterans.

(As a Marine officer in the war, Webb was highly decorated and

often wounded.) The administration allowed as how it preferred a team player. Webb is a player, all right, but his sport at the Naval Academy was boxing. His novel deals a series of stiff jabs to

much of the military establishment and a haymaker to the 1960s-

A Believable Mode of Leadership

At one level, the novel is about how a modern samurai, Fogarty, a midshipman about to graduate and become a Marine officer, becomes ensured by a civilian professor and lawyer as he tries to

Fogarty is about as far as you can get from a management-

oriented military bureaucrat steeped in the lore of systems analy-

sis. Fogarty's tools of leadership are a combination of old-fash-

ioned physical hazing and a program of instilling self-respect in the plebe, Dean, by getting Dean to juin him in pushing himself beyond what is asked of others — for example, sprinting in the

dim predawn light along the treacherous wet rocks of the acade-

my's sea wall. The physical demands that Fogarty forces Dean to undertake with him ring far truer, as the essence of leadership,

than those things that are done to Dean. It is part of Webb's skill

that he makes skeptical civilians understand how, for these two

Not Mainly About Hazing at All

It is clearly Webb's conviction that such physical testing is es

sential to mold the modern military man — and this view has

drawn fire from civilians and from many academy graduates as well. That conviction is a reasonable target, even in a debate

among heros. A Medal of Honor winner and former prisoner of

war, retired Vice Admiral James Stockdale, resigned recently after

a year of heading The Citadel in South Carolina, in part because be felt hazing was interfering with the institution's development academically and as an all-around military training ground.

Webb, victor in hand-to-hand combat with North Vietnamese

Webb, to appreciate what novelist Webb has done — any more than you have to be a Marxist or a pacifist to be moved by Bertolt Brecht's great anti-war drama, "Mother Courage." For at a level

much deeper than the adulteries and other diversions that swirl

through the book, and also well below the level of Fogarty's argu-

able method of bringing a plebe along the road to manhood and leadership, Webb is saying something — skillfully and perceptively — about what has happened to America's sense of honor during the last 15 years. This book is no more just about hazing than

Honor Carries a Heavy Handicap

Webb is saying that during those 15 years, a part — by no means all — of the American military establishment has been the

keeper and preserver of some essential values for society: sacrifice,

service and duty, among others. (The Naval Academy is a good metaphor for this; it is impossible to walk through it without

realizing that it is not merely a school for officers but the Navy's

seminary and shrine as well.) In the inevitable conflict between

these values of honor and the uncaring, intolerant civilian world

run by lawyers and such (Webb happens to be a lawyer, too), honor carries a heavy handicap. How the conflict was played out

in the '60s is the core of a book that ends with an elegant gesture.

In many other societies, even in a modern Western democracy

such as France, this timeless mismatch of values between the few

who serve and sacrifice, and the many who grumpily allow them-

selves to be served and sacrificed for, has had pathological results.

In the aftermath of France's withdrawal from Algeria, an event

comparable to the U.S. withdrawal from Victnam, much of the

French military retreated into itself, and its bitterness festered

into conspiracy and near-revolution. In the United States, this

conflict in values produces, instead, fine novels such as Webb's.

\$\int\_{0.1981, The Washington Post.}\$

"Moby Dick" is just about whaling.

You needn't agree on this point with boxer Webb, Marine

very believable characters, this mode of leadership could work,

save a brilliant but very non-military plebe from dropping out.

vintage self-image of many citizens.

incident of hazing at the U.S. Naval Academy as a prism to

#### By William Pfaff

toward intransigence. What else was possible if the United States was unwilling to make constructive proposals or negotiate on the issues of its hostility?

And the signals seriously disturbed the West Europeans, turning what had been a minor pacifist and neutralist current in West German socialism into a serious political phenomenon. Chancellor Helmut Schmidt's government is in trouble today, and a major reason is that for six months now the United States has seemed to many Germans to be aggressive and uncompromising, unwilling to negotiate its disputes and bent on exporting to German territory its nuclear confrontation with Russia. That is how the U.S. program to modernize the NATO theater nuclear missile force has been interpreted on the West German left, and in pacifist and Protestant church circles.

#### Time for a Change

Now the United States has lent support to the European Community's initi-ative on Afghanistan. Lord Carrington's plan for an international conference on Afghanistan naturally is distasteful to the Soviet authorines, who call it "not realistic." They are wrong. Its realism lies in the fact that the present deterioration in East-West relations was determined by the Soviet invasion of Afghanistan. It is logical that it be ended by a Soviet decision to accept a political solution to the war in that country. It is in their in-terest to do so as well, since a military solution, it now is apparent, lies a very long way down a very dark tunnel. The Soviet authorities would prefer to

talk about nuclear missiles in Europe, as they recently have reminded former West German Chancellor Willy Brandt. This is indeed a proper subject for East-West negotiations, but Moscow is mistaken to think that it can talk on this matter while refusing any concession on the matters which preoccupy the Western states,

It probably is also mistaken to think that political pressures within Western

Washington's new stand has another significance. A quiet struggle has been taking place in the administration be-tween those who think the Soviet Union is an outlaw force in the world, responsible for turnoil on four continents, must be isolated or even defeated if there is to be peace, and those other officials who look upon the Soviet Union as a "normal" power, albeit a difficult one. with whom negotiations and agree

ideologues.
It would be foolish to say that they have already won. It is a fact that the Soviet Union's response to this new initi-

on European missiles.

All are difficult subjects, but Lord Carrington and the West European gov-

Immigration:

Richard D. Lamm, Democratic governor of Colo-rado, wrote this comment for The New York Times.

DENVER — Abraham Lincoln put it well:

MORAD KHAVARY

Letters\_\_\_\_

Iran After Bani-Sadr

The initiation of the so-called "Third Revolution" in Iran is indicative of the inevitable change that has

The demise of Bani-Sadr, within the present ruling structure, is not really a matter of great surprise, for

Today, pressures postponed by the hostage crisis and the Gulf war have finally ferred themselves to the forefront of Iraman politics. With the radical

clergy as the only remaining segment of the large coalition that toppled the shah in 1979, the prospects of salvaging Iran from the hands of destructively incompetent individuals have never looked more realis-

tic. What is required is a coalition consisting of a secular political leadership such as Dr. Bakhtian's National Resistance Movement, allied with moderate

Time, although most important, is not a limiting

factor, as this coalition representing a majority of humans must prepare itself for the coming battle that will eletermine the future free existence of Iran's people, as well as the survival of its distinct culture and heritage.

clergy and supported by the anned forces.

yet to occur in that troubled country.

It was with a great deal of chagrin that I strended the annual Fourth of July celebration in Geneva sponsored by the American International Club and found that one of the featured attractions was the Orange Free State Wind Ensemble of South Africa.

Rather than have those representatives of a sacist regime appear under the banner of the United States, which flew high over the festivities along with the Swiss cross, it would have been far better for the image of my country if the organizers of the largest American Independence Day celebration outside the United States had left the stage bare.

GEORGIE I GARRICHES.

GEORGE L. GARRIGUES Detroit.

### Crime Against Humanity

In his article on pacifism in West Germany CHT June 23), John Dornberg writes. Then there are the Christians, both Protestant and lay Catholic, who take the Fifth Commandment and the Sermon on the Mount literally."

How else, I ask as a Buddinst, are they to take If in the past Christians had really practised their

'I Don't See Any Forest, Do You?'

religion, and if today the so-called Christian countries of the world really followed the teaching of Christ, the balance of terror, which is in reality the balance of ultimate terrorism, would never have come about. The use or threatened use of muclear and other weapons of mass murder must be outlawed as a crime against humanity.

NARA GREENWAY.

Rome

### Anti-American Germans

Re the article (IHT, July 6) on anti-Americanism in West Germany, I would like to stress that it is not public opinion but just certain quarters that are anti-American in this country. The large majority of Germans are still well able to distinguish between friends

That special sort of Yankee phobia you refer to is a temporary phenomenon destined to pass by, like bad weather and flu epidemics. It is caused by frustrated intellectuals who tend to forget that it is not American but Soviet missiles that sin at their playgrounds, and that it is the Americans who guarantee the exercising of all kinds of political foolishness in West Germany.

ERICH WIEDEMANN. Jesteburg, West Germany.

### Anti-Abortion People

An article by Charles Peters ("On Knee-Jerk Responses," IHT, May 30-31) contained the following passage: The anti-abortion people refuse to acknowledge the occasions when having a haby would be disastrous for a mother or her family—or the toughest fact of all, the fate that is suffered by children who are trade managed? dren who are truly mwanted."

These statements are false. There are plenty of suni-abortion people who perceive the problems involved if certain children are brought to term and born. And they are trying to do something about these problems. Some of them are dedicating their lives to the endeavor.

I suggest that the witer do some investigation into the matter. He could check on the organization "S.O.S. Mothers to be" or contact "Life," 35 Kenilworth Road, Lemington Spa, England, There are other sources he could contact but these are enough to get him started if he is interested in the truth-

### VW's Immigrant Status Adds to Problems in U.S.

By Lydia Chavez

New York Times Service WESTMORELAND, Pa. - The rhythm of the assembly line is

WESTMORELAND, Pa. — The rhythm of the assembly line is hypnotic. Young men and women fasten on accessories in measured steps while the freshly painted frames of Rabbits bob down the line to a meeting with their West German-made engines.

The orderliness of the three-year-old plant, however, hides the problems that Volkswagen has encountered since it decided to open its first assembly plant in the United States.

In the early 1970s the popularity of the Beetle helped the West German automaker capture 6 percent of the U.S. market. Sales fell off sharply in the mid-1970s, and the company began to consider the possibility of building cars in the United States.

The construction of the assembly plant has not ended the troubles, however. Last year Volkswagen's share of the market was down to 2.5 percent, and lagging car sales promoted it to close its

down to 2.5 percent, and lagging car sales prompted it to close its plant here for a week in June. When the plant reopened, production was cut by 100 vehicles a day — to 940 Rabbits and small tracks — and 300 of the plant's employees were laid off.

"We are not doing as well as we would like to do," said Richard L. Mugg, vice president of sales and marketing for Volkswagen of America, a subsidiary of West Germany's Volkswagenwerk. "We would not have closed the Westmoreland plant if everything was

vosy."
While Volkswagen's U.S. unit earned \$10 million in 1979, it lost \$30 million in 1980, and most analysts believe it will have difficul-

ty turning a profit this year.

Although some of the problems are like those plaguing other auto manufacturers, Volkswagen has a few special problems arising from its immigrant status.

When the company decided in the late 1970s to build the Westmoreland plant at a cost of \$400 million, the Deutsche mark was quite strong as compared to the dollar. What could be built in West Germany could be built in the United States at less cost. "They can probably still produce the cars cheaper here," said

Donald Hurten, manager of automotive consulting for Arthur D.

Little, "But if the mark continues to drop, it could shift the cost benefits back to Europe." Volkswagen of America imports about 40 percent of the Rabbit's parts, including the engine. Many of the car's other components are made in the United States by manufacturers that charge

Volkswagen a premium because of its stringent specifications and

The high hopes at Volkswagen have dimmed since the 100,000th Rabbit was built at the U.S. plant two years ago.

relatively small orders, according to Roy H. Langenbach, the Westmoreland plant manager.

Its reliance on outside manufacturers has been reduced to some extent by the addition of a stamping plant and an air-conditioner and heating plant.

"When you have to buy so much of your products, your profit margin is naturally going to be smaller," said LeRoy H. Lindgren, vice president of Rath & Strong, a consulting concern in Lexington, Mass.

Despite Volkswagen's problems, the company seems determined to proceed with a second plant at Sterling Heights, Mich. It is to open next year at a cost of \$300 million. Production will

gradually increase to 185,000 cars a year by mid-1983.

Of the 293,595 cars and trucks Volkswagen sold in the United States last year, two-thirds were assembled at Westmareland. Mr. Mugg says his company should be able to sell the output of both plants - a combined capacity of 410,000 a year - plus

100,000 imported cars by 1984. To do this, Volkswagen sales would have to jump 74 percent. Considering the dismal auto market that most analysts predict for

the next five years, Volkswagen's hope for steady growth of more

### Rate, Policy Uncertainties Becalm Market

By Carl Gewirtz

PARIS - Continuing high shortterm interest rates and fatigue from waiting for the ever hopedfor relaxation of U.S. monetary policy just about shuttered the Eurobond market last week. And the outlook for this week is equally un-

Late Friday, the New York Federal Reserve reported that the U.S. money supply declined — M1-A down \$500 million and M1-B off \$1.3 billion — in the week ended last Wednesday. This was especially good news, as many analysts had been anticipating an increase. The immediate impact was to push interest rates lower as prices of bills, notes and bonds rose in late New York trading.

However, this gain was immedi-ately crased when the Fed in Washington released the minutes credit," the minutes said.

of the May 18 meeting of its poli-cy-making Open Market Commit-

Credit markets were joited to discover that the Fed had reduced its short-term targets for April-

### **EUROBONDS**

June growth for M1-B to 3 percent from the previous 5½ percent and for M-2 to 6 percent from 10½ per-cent. At the same time, it hiked the target range for the cost of federal funds to 16-to-22 percent from 13-

Continued Risk Seen

"Indications of continuing strength in economic activity combined with the recent exceptional rise in the income velocity of money posed the risk of pressure for excessive expansion in money and

The recent moderation in the consumer price index "did not appear to reflect as yet any clear relaxation of underlying inflation," the minutes added.

In light of this report, analysts took another look at the large rise in bank commercial and industrial loans of \$3.66 billion in the week in Wedneday as well as the \$5.5billion loan being organized for Texaco, the \$3 billion for both Du Pont and Conoco and the \$2.5 billion for Pennzoil and began to worry how the Fed would react to

The fact that the cost of overnight money in New York on Fri-day had ranged from 18 to 19/2 percent before closing at 19 per-cent was taken as a hopeful sign that the Fed was not too worried. However, analysts fretted that the Fed's willingness to supply funds on Friday may have had more to do with the transfer to Iran of \$2

billion of previously frozen funds than as a signal of the Fed's attitude to the market

Despite this very uncertain background, one new issue has been scheduled for this week. Arizona Public Service Co. plans to issue \$50 million of seven-year paper bearing an indicated coupon of 16 percent. Only a handful of Eurobonds have ever been floated with so high a coupoe.

The utility's first mortgage bonds in the United States have been rated A by Moody's and A-by Standard & Poor's. The Euroissue is unsecured and therefore would carry a lower rating.

No pricing has been indicated

(Continued on Page 9, Col. 5)

### administration's latest economic forecast, to be ufficially released this week, predicts a virtually stag-nant U.S. economy for the rest of Unemployment is expected to rise to 7.7 percent by the fourth quarter from its present 7.3 percent interest rates should begin to fall and a continued slowdown in

According to the Reagan figures, unemployment will decline steadily from 7.6 percent in the first three months of 1982 in 7 perfirst three months of 1982 to 7 per-cent by year's end, sources said. Many private economists are less optimistic, believing that the Fed-eral Reserve Board's tight money policies will keep the economy from growing very rapidly and un-employment from coming down. Real growth is supposed in average 3.4 percent next year, down slightly from the original 4.2-percent estimate.

But the latest numbers showed that the administration is sticking by its original optimistic view of the economy beginning with 1982.
[Commerce Secretary Malcolm Baldrige predicted, in an interview with The New York Times, "a mugher third and even fourth quarter than most people are looking for." He also forecast that the Federal Reserve Board "mill bear the product of the p Administration officials say that Mr. Reagan's tax and spending cuts together will bring down in-terest rates and inflation while leaving room for economic growth. #### troubles on what be called "overstimulation" of the economy during the 1980 election campaign. He Airbus Accord Signed

BELGRADE — The Soko Yugo-slav aircraft industry of Mostar has signed a cooperation agree-ment with the Airbus Industrie consortiumn, officials said Saturforecasts of a growing economy coupled with declining inflation have been seen as unduly rosy by many outside economists, whose day. It provides for Soko to organize and coordinate work done in Yugoslavia on the A-300 and A-310 aircraft and to participate in future projects, the officials said.

t5 percent — and will slide quarter by quarter during 1982 in 9 per-cent by the end of the year.

The higher interest rates will push up federal spending this year and next, but because of a delayed tax bill the budget deficit numbers for 1981 and 1982 are not expected in be changed very much, sources said. This year's budget gap is expected to be higher than the \$51 billion to \$52 billion predicted re-

cently by Treasury Secretary Don-ald T. Regan.

Another factor putting pressure on the deficit is that tax revenues have been less than expected so far this year.

One of the parts of the forecast that is most likely to be challenged by outside economists shows interest rates falling steadily through-nut next year and thereafter, to as low as 5 percent in 1987. By then the annual inflation rate, as measured by the consumer price index. is forecast to be only 3.9 percent; real growth is also expected in be 3.9 percent and unemployment 5.3 percent of the labor force, sources

Such a combination of high growth and slowing price rises during the 1980s would make a balanced budget much easier to achieve. The Congressional Budget Office disagreed with the administratinn's earlier predictions of a balanced budget by 1984, largely because of very different economic assumptions.

The Reagan scenario shows the economy's growth rate peaking at 5 percent in 1983.

### **CURRENCY RATES**

# Thomas Cook. Europe's No.1 issuer of Travellers Cheques

Thomas Cook Travellers Cheques have grown by nearly 400% since 1975, an increase which has doubled our market share. Here are some of the reasons why.

	Thomas Cook	Citicorp	Bank of America	Visa	American Express
Longest Experience	1				
Worldwide Acceptance	✓	✓	1	✓	✓ /
Extensive 24 Hour Refund Service		/		✓	/
Worldwide Presence	1		}		/
Widest Currency Range	1	}			
World's Largest Travel Organisation	1				
	,		•		

### Thomas Cook No.1 for Experience.

Thomas Cook pioneered travel money over 100 years ago, long before any of our competitors.

Thomas Cook No. 1 for Acceptance.

Today, Thomas Cook Travellers Cheques are welcomed in millions of establishments around the world. Few other travellers cheques are.

### Thomas Cook No. 1 for Refund Service.

If your travellers cheques are lost or stolen, Thomas Cook offer you immediate help.

Free of charge. 24 hours-a-day 365 days-a-year. Through our Anytime-Line telephone service in USA and Canada, UK and Europe. And worldwide refund assistance through

Hertz, Thomas Cook and Wagons-Lits offices.

### Thomas Cook No.1 for Worldwide Presence.

Thomas Cook provide advice and assistance on your travel problems through more than 1,000 travel offices in 145 countries. No other travellers cheque issuer provides such a wide service.

### Thomas Cook No. 1 for Currency Choice.

Thomas Cook offer Travellers Cheques in 9 currencies, more than any of our competitors.

Including the US Dollar, £ Sterling, French Francs and other major currencies covering the world.

It's a long list, but then Thomas Cook are the largest travel organisation in the world.

# Thomas Cook.

The accepted name for money. Worldwide.

Europe's No.1 issuer of Travellers Cheques.

REAFE

This announcement appears as a matter of record only.

Washington Post Service NEW YORK - The day of the big corpo-

raid merger has returned. After something of a hill in 1980, the multibillion-dollar acquisition is back in the news. Last Monday Du Pout, the largest U.S. chemical company, announced what will be, if ap-proved, the largest merger in history in its plan to spend \$7.3 billion in cash and stock to buy Conoco, the minth-biggest U.S. oil company. The value of the merger, however, rises and falls with the change in the stock price.

[Conoco said Friday that it has boosted its line of credit to \$3 billion, a stockpiling of cash that immediately aroused speculation that it

may have fears that its merger with Du Pont is in trouble, The Associated Press reported.

(Some analysts believe that Conoco might be raising a defense fund in case it has to fight off an unwanted suitor, while the company said the line of credit — from domestic and foreign banks - was arranged "for general corporate purposes."

("It sounds to me like too much for general corporate purposes," Constantine Fliakos, an analyst for Merrill Lynch, Pierce, Fenner & Smith, told The Associated Press. He speculated that Conoco might be considering bidding for its own shares if that becomes necessary tn fight off a hostile bid.

[Conoco said its line of credit was arranged with a group of banks led by Bank of America, Chase Manhattan and Morgan Guaranty Trust. It replaces a \$1-billion line arranged in May.]

#### Largest of Many

But the Conoco-Du Punt courtship - a "friendly" link-up — is merely the largest of a host of gigantic mergers and merger attempts in the past few months:

· Standard Oil of California (Socal) wanted in pay \$3.9 billion to buy AMAX, a deal that AMAX spurned, although Wall Street sources say Socal may make another run at the firm.

· Elf Aquitaine, the oil company 67-percent owned by the French government, has made a \$2.8-billion offer for Texasgulf, a leading sul-fur producer that has endorsed the purchase. Standard Oil of Ohio bought Kennecott, the big copper producer, for \$1.8 billion.

• Nabisco and Standard Brands - the giant food packagers — engaged in a true merg-er, combining in become Nabisco Brands.

· Seagram, the big Canadian distiller, has Seagram, the big Canadian distiller, has played a major role in two of the recent mergers, and nne highly placed Standard Brands source said fear of a Seagram bid helped propet the Nabisco merger. Seagram made an unsuccessful \$2-billion bid firr St. Joe Minerals, which St. Joe fended off by finding a white fnight, Fluor Corp. Seagram's \$2.55-billion attempt to gain control of Conoco drove the oil company into the arms of Du Pont, which has long had a desire to find a secure source of long had a desire to find a secure source of petroleum for its petrochemical operations.

Two years ago, however, it is doubtful that corporations would have entertained the idea of a combination as big as Du Pont-Conoco, let alone actually make the offer.

Io those days a Democratic-controlled Congress appeared willing to put the clamps nn big corporate combines, while the Carter administration, at least publicly, also looked askance at two big businesses merging. One bill sup-ported by biberals would have limited all conglumerate mergers, while another would have blocked large purchases by oil concerns of nonpetroleum companies.

But Congress never passed the legislation, and now only the House remains in the hands of the Democrats and the antitrust attitude in the Reagan administration toward mergers is significantly looser.

run by a Carter appointee, permitted Exxon, the giant nil company that is the world's largest industrial corporation, to spend more than

\$1 billion two years ago to buy the giant elec-trical equipment producer. Reliance Electric. Even if companies looked at what the Carter administration said rather than what it dio. they must feel more comfintable with Mr. Reagan. Attorney General William French Smith said two weeks ago that bigness was not necessarily bad.

You knew that the pendulum would swing because antitrust doesn't have a constituency supporting it," said a liberal former government antitrust official. "When in a period of economic crisis, you need a whipping bny. The (Continued on Page 11)

### More U.S. Investors Buying Gold Even as Price Flirts With \$400

NEW YORK — Investors in gold had their faith in the metal tested again last week as its price twice dipped briefly below \$400 a troy omice, the level that investors currently consider a significant psychological barrier.

But those who bought gold — whether at the record \$875 in New York on Jan. 21, 1980, or at \$400 some 19 months ago, or at \$445 two weeks ago — remained steadfast in their belief that the metal represents a great-

In fact, dealers, banks and brokerage houses that serve the retail trade in gold bullion coins and bars reported last week that, with prices at a 19-month low, buying volame has been rising in recent weeks.

er store of value than paper money or securi-

Oddly, shares in gold mining companies on all exchanges, particularly those of South African producers, have also been rising despite the fact that their yields have fallen dramatically in the past year and are now helow U.S. Treasury bill yields, an unusual relationship for the gold stocks.

That does puzzle market experts. "It makes no sense today to buy South African gold shares," said Andre Sharon, senior vice president for international investments at Drexel Burnham Lambert. "The yields on South African shares, for example, now range from 10 to 14 percent, compared with 25 to 35 percent a year ago. With the current yield on Treasury bills running at 14 percent, why bother with the gold shares? Bullion coins and bars are far more attractive to-

But investors continue to seek the shares and in the past week or so, the prices have been rising, while yields are way down. The most popular South African gold shares are ASA Ltd., listed on the New York Stock Exchange. Friday, ASA closed at \$47%, up over three points on the week 47, despite a yield of only about 11 percent. In the spring of 1980, by contrast, when gold slipped to \$500 and was on its way to a sustained gain, ASA shares were at the 40 mark.

Investing in bullion coins and small bars is attractive because the transactions in these items, a major factor in the so-called subterranean economy, are free from the scrutiny of the tax collector. Bullion coin dealers and banks do not have to report transactions of less than \$10,000 to the Treasury or Internal Revenue Service.

E1172 F

At the retail level, the interest in gold coins has accelerated in the last fortnight. "Our business has suddenly come to life after being in the doldrums since the usual Christmas purchases of Krugerrands and other bullion coins for gift-giving," said Nic-

olas L. Deak, president of the Deak Perera Group, the largest retailer of gold bullioo coins. He also said there had been fairly heavy selling of bullion coins in the last two weeks because people who had bought at higher prices wanted to establish a tax loss. Then, he expects them to turn right around and buy again.

#### **Bottoming Out**

The upsurge in buying particularly of bullion coins, has been traced directly to the belief that a market bottom has been reached. One reason for this view is that the prices have sustained two downward assaults this past week alone, each time refusing to stay below \$400. According to commodity analysts, that means a trend reversal is in the Works.

Frederick S. Bogart, senior vice president and chief of precious metals trading at the Republic National Bank, the largest gold dealer among banks, also reported an upturn in business. "I wouldn't term it spectacular, but business, both retail and wholesale, is better than we have have seen it since January, when many of our staff bad nothing to do," he said. The increase in buying also applies, he said, to silver, "which suddenly began to attract buyers when its price dropped below \$9 an ounce a few weeks ago."

Jacques Luben, Merrill Lynch's senior market specialist in precious metals, also re-ported a rise in small investor interest and in paper gold," or warehouse receipts for bullion kept in domestic or foreign bank vaults. He said his company's business in bullion coms and paper gold picked up significantly after gold broke the \$450-an-ounce level two weeks ago, and that it has drawn new buyers into the market. Merrill Lynch's paper gold program, the Share Builder Gold Program, is similar to those at other big brokerage bouses, banks and retail coin shop chains. They operate like money funds, except that the funds deposited are used to buy gold at the going price. Withdrawals are also based on the prevailing bullion price.

#### Business Picking Up

"What has been unusual during the recent fall in gold prices," he said, "is that we found a large number of first-time buyers — people who missed the last big advance and oow want to get on the next one. As for the others, they are mostly people who ignore price moves. They are not gold bugs but basically investors in securities who put aside a fixed amount of money each month to buy bullion coms or our paper gold."

Mocatta Metals, the U.S. affiliate of the 300-year-old London brokerage house, is reportedly the biggest bullion dealer in gold and silver. It does not handle retail business,

Gold's luster has dimmed but has not disappeared despite the slump in prices.

but its trading room manager in New York, Ira O. Handler, said that "judging from the retailers and secondary wholesalers we sup-

ply, business has picked up in recent weeks."

Mr. Handler also reported a new trend among small investors in gold. "Many investors in bullion coins are switching from South African Krugerrands to the Canadian Maple Leafs," he said. "From what our customers tell us, it has nothing to do with South Africa's racial policies. Rather, it has to do with the premiums. Krugerrands retail for 3 to 4 percent above the value of bullion at the time of sale, while the premium on the same one-ounce Maple Leafs is about half

Mr. Handler said that many investors also prefer the Maple Leaf because it has no base metal added to strengthen it, as does the Krugerrand coin. But both coins contain a full troy ounce of gold and unless one plans to melt down bullion coins, it really makes no difference," he added.

The consensus about future trends in gold prices was summed up by one of the most steadfast gold bugs, Paul Sarnoff, research chief at Rudolf Wolff Commodity Brokers Inc., the U.S. arm of the London metals brokerage bouse.

"There is no doubt that American investors are gold-conscious," Mr. Sarnoff said. "That is why the biggest commodity ex-changes, the Chicago Board of Trade and Mercantile Exchanges, have asked the gov-ernment for permission to trade in bullion coins along with their existing markets in gold bars." It is expected that these new futures contracts will be approved later this

#### Citicorp Issue

\$100 million

The borrower was Citicorp, which sold five-year notes bearing a coupon of 15 percent at a price

of 99 to yield 15.30 percent. Although rates on six-month to three-year Eurodollar deposits currently pay from 17% to 16 percent, merchant bankers Hill Samuell advsed investors to buy quality bonds bearing coupons of 15 per-

cent or more.

While this involves giving up an immediate advantage in the deposit market, the bank notes: "A drop in money market rates will push up bond prices. Only a 11/4 point price appreciation is occessary to make up this difference on a 14 percent two-year bond and two points on a three-year bond. Given our expectations for lower rates, this remains a distinct possibility plus the added potential for capital gain on bonds in this range."

#### Japanese in Market

The market for bonds convertible into common stock remained buoyant, with Japanese issuers dominating the activity. Tokyo Sanyo Electric is raising

\$30-million through 15-year privately placed convertibles. The indicated coupoo is 5% percent and a conversion premium of about 5 percent is expected.

### Italy's Stock Markets Are to Reopen Today

ROME - Italian stock markets, closed by the government Wednesday after a selling wave, will re-open Monday bolstered by new measures designed to prop up prices, Treasury Minister Benjamino Andreatta said.

Banks, insurance companies and private investors have agreed to make protective purchases of stock, be said. The government is taking action to discourage specu-lation and the Finance Ministry propose tax cuts for small

down during syndication) is a bit sticker. Banobras had issued to managers a written mandate that included the mechanical formula

for switching to the CD rate.
In effect, Banobras is seeking to

reword that mandate — a move the banks have been resisting for

rower can prepay the loan at no upon.

half of this year were down 4 per-Volkswagen's management sees a "pent-up market for cars" build-ing while high interest rates discourage buyers. Auto analysts, however, anticipate a market that will have sporadic strength but in

general will remain flat. Part of Volkswagen's problems reflect increased competition and a hange in motorists' buying habits, The Beetle's popularity was assured by its modest price and unnsual style in a market that consisted mostly of larger cars. But now the Rabbit (known as the Golf in Europe) must compete with a multitude of other small cars, including some Japanese models that analysts say are comparable in engineering flashier in appearance and, in some cases, less expensive

than the Rabbit. The discrepancy between Volkswagen's sales forecasts and those of others is making industry observers assume that the West German manufacturer may have something else in mind for the Sterling Heights plant.

"What looks to me and you like an impossible growth in sales is

impossible," an industry analyst said. "But Volkswagen's manage-ment and financial planners are

the best around. You can bet they

some months. The BNCE and

Banco Somer deals were syndicat-

ed with the understanding that

One result of all this is that

understand the market well and are not going to do anything stu-Volkswagenwerk is talking to Nissan about making cars in Ja-pan. And some industry sources believe the West German company has proposed a joint venture with the Japanese company at Sterling

eights. Volkswagen denies such discussions, and it refuses to say what kind of cars will be assembled at

the Starting Heights plant.
As for the Rabbit, Volkswagen depends on the car's fuel efficiency and reputation for quality to at-tract buyers. When Volkswagen executives are pressed on how their sales can jump dramtically, they smile and mention Volkswagen's

"tradition of technology."
But Volkswagen's present troubles do not necessarily make its decision to come to the United States a bad decision.

Over the long term, the immediate goals might not be quite so important," said Henry Mathews, a senior consultant with Arthur D. Little. "They are a worldwide manufacturer, and they have proved they are technical leaders. That gains them a lot."

Mexican borrowers will no longer made during the 1970s to Eastern be allowed to issue mandates—the finance ministry will now han-to escape the hard "guns or butdle all the details of such international operations.

Mexico, Banks Reach Accord on Wording for Loans

One irony of doing business with Mexico that bankers do not want to discuss is that their loans enable Mexico to keep the price of its oil higher than warranted by market conditions.

Mexico needs huge sums of money to finance its very ambitious development program, which is keeping the economy expanding at an 8-percent "real" rate of growth its oil exports are the base for, this growth. But Mexico is unwilling to price its oil to sell -a \$4 per-barrel cut in the price was abruptly rescinded to \$2 and ma-

jor buyers have refused to buy.

If Mexico needed the money, it would be forced to set a price that oil companies would accept. Instead, Mexico has simply calculated the shortfall from the anticipated decline in this year's oil sales and added that amount to what it plans to borrow from the banks. In effect, the banks are financing

ter" choices by making guns and importing butter on Western credit. It was the same when Brazil, Mexico, Colombia and other coffee producers were actively storing beans rather than sell at a time when prices were declining from record highs.

### Political Issues

Bankers refuse to discuss what they call "political" issues, saying that is a matter for governments. Bankers also note that all dollars look alike, making it impossible to enforce that dollars lent for a specific purpose are not diverted to financing something else.

And they agree with a Mexican,

who shrugged the question off. "In a world of no competition," said this official who recently visited Paris, "you might expect such a re-action. But Mexico is a good cus-tomer of the banks" and the competitive nature of the business assures Mexico of a steady source of

Mexico's intransigence.
This is really no different from the huge loans Western banks He said that Mexico borrowed \$11 billion in the first six months of this year and expects to need

### BOOKS.

THE COMPOSER'S ADVOCATE A Radical Orthodoxy for Musicians By Erich Leinsdorf. 216 pp. \$14.95. Yale University Press, 92A Yale Station, New Haven, Conn. 06520.

#### NOTES OF SEVEN DECADES

By Antal Dorati. Illustrated. 371 pp. \$22.50. Wayne State University Press, The Leonard N. Simons Building, Detroit, Mich. 48202.

THE GRAMMAR OF CONDUCTING A Practical Guide to Baton Technique and Orchestral Interpretation By Max Rudolf. Illustrated. 471 pp. \$16. Schirmer Books, 866 Third Ave., New York 10022. Reviewed by Donal Henahan

THE art of conducting orchestras is an arcane one, but it can be penetrated. Antal Dorati's daughter. at the time only 3 years old, was able to put her finger on the mystery after listening to him lead one rehearsal: "Daddy, you are the only musician who makes no noise!" Dorati's colleague, Erich Leinsdorf, who devotes a good deal of space to discussing the craft of conducting, sums up the mystery in this way:
"One of the differences between

evaluating performers who sing or play instruments and those who conduct is the inability of most lay people to understand what conductors are doing Many music lovers can easily distinguish a first-rate tenor from an indifferent one, an outstanding pianist from a routine performer, or a truly fine string player from a scratchy practitioner. Uncertainty of pitch, shortage of breath, or sloppy banging on a piano can be detected by most listeners. Yet these same listeners are at a loss to judge the capabili-ties of a conductor. The qualifications for this clusive art and craft are a mystery to all but a very few experts." That says it, certainly, though less directly than did the young Miss

Complicating the mystery is the sticky issue of baton technique and the conductor's schooling matters that are lucidly treated in Max Rudolf's classic handbook, now published in an enlarged second edition. However, out of his decades of experience. Dorati wishes to report that conducting schools are of little or no use: "For conducting 'technique,' of which one hears so much spoken in a highfalutin, superficial way, can be dismissed as hardly existing. It is an ele-mentary set of signals which can be explained in a few minutes, and understood in less."

Leinsdorf concurs. Musical performance, he says, is an extension of burnan personality: The simple fact that sound is a part of personality has, from my earliest acquaintance with conducting, made me dubious about so-called baton technique. I have always refused to teach conducting, supporting my refusal with the argument that the motions are of no con-

And yet, just as obviously, no conductor can draw music from an orchestra unless he knows the basic lan-

guage of conducting and can use it fluently. The time-beater who thinks it necessary to break each measure of a fluid adagio into a dozen subdivi-sions would have a difficult time coaxing a proper legato from the musicians — unless, as could happen, the musicians decided to put their heads down and ignore the distractingly jer-

Ultimately, despite their variety of viewpoints, all three of these books are testaments to the overriding need for authority in the orchestra conductor. But not, as often was so in an earlier time, authority built purely on tyranny and fear. Leinsdorf recalls that when he arrived in the United States in 1937, "a musician at the Radio City Music Hall would recognize that he was being given notice if the conductor raised two fingers of his left hand while continuing to heat time with his right. It meant that the unfortunate person had two weeks of employment left."

Now, of course, the music unions in the United States do not put up with that sort of thing. In fact, says Leinsdorf. The pendulum has swung all the way from one extreme, when conductors brutalized musicians and dismissed them without warning for real or imagined failures, to the other, in which ideas of social justice take pre-

cedence over concepts of excellence."

That swinging pendulum has brought with it, however, certain clear gains not only for the orchestral musician but also for the general musical health. Far more than in the past, authority now must be proved in the merciless fire of rehearsal and per-formance. The writings of most con-ductors can be read as briefs in their own defense — as proofs piled upon proofs that they deserve to stand before other musicians and impose their

Dorati, for instance, wants it understood that he not only knew Bartók and Stravinsky but that the compos-ers sanctioned certain interpretations of their scores in private discussion with him, like Moses receiving the stone tablets. Similarly, Leinsdorf can refer to the three years he spent as Toscanim's assistant at the Salzburg Festival in the 1930s. Especially in a conductor's early years, such proxy authority may be as valuable to him

as absolute pitch.

Finally, however, a superior conductor's success with an orchestra is based on just one thing: He knows more than the musicians do and he hears better, and they accept the fact, however grudgingly. Once that is un-derstood — and Dorati, Leinsdorf and Rudolf all help, in their fashions - the question of how one musician who makes no noise can become so much more respected than another will seem less of a mystery.

Donal Henahan is music critic of The

### **CHESS**

By Robert Byrne

THE temptation is always there to grab the first thing available rather than to look deeper to discover a more potent way to get the upper hand. Especially when there is materi-al for the taking, the chances are that it will be seized without even a serious glance at alternatives.

Most of the time, the obvious course is sufficient and correct, yet there is also a significant minority of positions in which foregoing material gain in favor of maintaining the attack yields a decisive control of the play. One example of this is the game between Alexander Belyavsky, the Soviet co-champion, and Ulf Andersson, a Swedish grandmaster, from the Moscow International Tournament.

The Keres attack, 6 P-KN4!?, is still botly disputed: Will it cramp the Black position or will it loosen and weaken the White position? It is adopted by the conservative as well as the adventurous because the alterna-tives, 6 B-K2, 6 B-K3 or 6 P-B4, are too tame to put a dent in Black's solid-Scheveningen system.

(In the game between the world (In the game between the world champion, Anatoly Karpov, and a former world champion, Boris Spassky, in Tilburg last year, Black tried counterplay in the center with 8 . . . P-Q4, but White got a dangerons attack with 9 B-QN5, B-Q2; 10 PxP, NxP; 11 N/3xN, PxN; 12 B-K3!?, B-K2; 13 Q-Q2!?, BxRP; 14 0-0-0.)
Anderson preferred a wing counterattack with 8 . . . P-KR4, encouraging the advance with 9 P-N5 so be

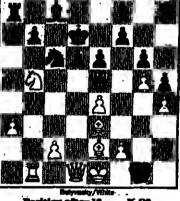

aging the advance with 9 P-N5 so he might develop tactical threats with his 9 ... N-KN5. On 10 B-K2, Q-N3;

9...N-KN5. On 10 B-K2, Q-N3; II BxN, a difficult position to judge would have arisen from 11...NxN!?; 12 B-K3, P-K4; 13 BxB, RxB; 14 R-N1. If White can arrange to play N-Q5 soon, his game would be positionally overwhelming.

Andersson did not trust defending that, but after 11...QxN; 12 B-K3! (12 BxRP?!, P-KN3; 13 B-K2, RxP activates Black's pieces), he did not like the ending after 12...QxQch; 13 BxQ, since White's advantage in space might be umpleasant.

Andersson might have tried 14...Q-R4, but he is addicted to exchange sacrifices, and with 14...Q-R4, but he is addicted to exchange sacrifices, and with 14...QxNP; 15 N-N5; Q-K4, permitted Belyavsky to capture a rook by 16 N-B7ch, K-Q1; 17 NxR; the idea here was that he could catch the trapped knight with 17...B-Q2, followed by 18...K-B1 and 19...K-NI.

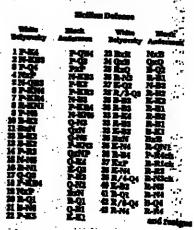

But Belyavsky crossed him up hy playing for attack with 16 R-Ni. K-Q2; 17 Q-Q3! It was now futile to try. 17...P-Q4 because of 18 P-KB4I.

# 7 Top 3:51 Mile In Oslo; Coe Sets 1,000-Meter Mark

By Neil Amdur New York Times Service OSLO .- In perhaps the most mazing mile race ever seven onds Saturday night, led by Steve

Ovett's winning performance, during the Dulux Games at Bislett Stictium, was slower than his Sunting was slower than his sent record 3:48.8 set here last ment fellowed Sebastian Coe's fecord breaking 2:12.68 for 1,000 animates; may have ushered in a new year in the mile.

José Luis Gonzales was second to Overt in 3:49.67. Steve Scott stapped Jim Ryun's 13-year-old U.S. necord of 3:51.1, finishing third in 3:49.68.

is intrinsically and mark also was bro-belien by Todd Harbour, who was shift in 3:50.34, two studes behind light Walker of New Zealand (3.50.26), the former outdoordescription in 3:52.44. Earmonn Scholar of Ireland, the indoor mile king was ninth in 3:56.50, a mile king w

Inspiring Stadium With a brisk early 400-meter pace of 51.6 seconds from James King, an American who was added to the field as a rabbit only 45 minnter before the race, Coe sprinted past the 800-meter mark in 1:44.3, faster than the winning time in the open 800 earlier in the evening. Last year, Coe ran 2:13.40 here in sching the previous mark

"There is something about this stadium," Coe, the 1980 Olympic 1,500 meter champion from Britain, said of his second worldrecord performance in a month. It's the atmosphere. You can be liked beyond belief before the gun

Coe's triumph, before a crowd of 12,822, followed his worldrecord 800 (1:41.72) last month and a 3:31.95 for 1,500 meters, the "Whird fastest ever, earlier in the

Now I've got to slow him down," said Peter Coe, his father and coach, who was shouting out splits in the early stages on the 400-meter track and then waving a jacket at his son in the final straightaway, 30 meters from the finish. "Now I've gof to rest and take care of him. I can't have him." going over the top.

Another Olympic chamion, Edwin Moses, extended his amazing string of victories in the 400-meter ... hurdles. And James Robinson. America's No. 1 half-miler, drove the last 60 meters and outleaned Harald Schmidt of West Germany in the final strides of the 800 (1:44.95 to 1:44.96). Pentti Siner-sari of Finland unloaded a winning javelin throw of 293 feet 4

But not all of the stars escaped. Grete Waitz of Norway was forced out of the 5,000-meter race with a foot injury while she was on a record pace at the 3,900-meter 'mark Ingrid Christensen of Norway won the event in 15 minutes 28.43 seconds and was credited with a world record as she beat the mark of 15:30.6 set by Jan Merrill of the United States. A faster time has been posted by a woman, but it was in a race against men.

compensation.

special amateur draft selection.

upward — from bottom or middle to top, or from bottom to middle. One of the owners' major objec-tions to the proposal dealt with the teams that would receive professional compensation for the loss of a premier free agent.

**Mediator's Proposal** 

New York Times Service

Kenneth E. Moffett, the federal mediator in the major league

NEW YORK - Terms of the settlement proposal suggested by

A premium free agent will be defined as any eligible player in

the top 20 percent at his position, based on statistical criteria over

agents, those with more than 12 years of major league service, and

those who are 35 or older will be excluded from the premier cate-

Premier free agents can negotiate with any number of teams rather than being limited to selection by 13 teams in the free-agent

draft. Other free agents will be subject to the draft as it has been

In any given year, only 12 premier free agents will require com-

The extent of compensation, given and received, will be deter-

pensation of a professional player to the free agent's former team.

The compensation for any additional premier free agents will be a

mined by a team's relative standing. Based on two-year records, the 26 teams will be divided into three categories: the top nine, the

middle eight and the bottom nine. If a premier free agent moves

up two levels, from a bottom team to a top team, the signing team

will protect 24 players, and the losing team will select an unpro-

tected player. If a premier free agent moves up one level, from the bottom in the middle or from the middle to the top, the signing

team will protect 30 players. If a premier free agent moves within

the same group, the team losing him will receive an amateur draft

choice. If a premier free agent moves downward, there will be no

player as compensation, it will pay the compensating team a sum

of money, presumably to reduce the punitive aspect of direct com-

pensation. If the compensating team protects 24 players, it receives \$200,000. If it protects 30 players, it receives \$150,000.

to its original shape."

"This is the Tripper," Sandy

made bere, including sails.

When a team loses a free agent and receives a professional

Under the plan, there would have been no professional compensation if a premier free agent moved laterally within a group or moved downward. A team losing a player moving laterally would receive an amateur draft choice as compensation. A team losing a player to a team in a lower group would receive no compensation.

"That procedure yields virtually no compensation," Grebey said That proposal would require more compensation for players below the ranking player level than for a ranking player. The chibs oever were interested in doing

The owners also objected to a casb paymeot, \$200,000 or \$150,000, depending on other variables, that would have to be made by the team getting the compensation player to the team losing him. When Miller was asked if the

owners' negotiators suggested any substitutes for those two provisions, he said, "I will quote Grebey: 'No, not at this time.'

Controversy had surfaced over the authorship of the proposal. Grebey said that it was actually Miller who was the source of the proposal, and the union chief said that the owners' chief negotiator

After meeting until about 2 a.m. Saturday, the bargainers returned in the table at II a.m. and, in the next two hours, met jointly for about 40 minutes before recessing

Moffett made a special trip to New York from Washington on Thursday to deliver the proposal to Grebey and Miller, and it be-came the primary topic of conver-sation when talks resumed Friday after a five-day recess.

Nancy Broff, general counsel for the Federal Mediation and Conciliation Service, said Saturday that she had oo knowledge of Miller's involvement in drafting the pro-"I wrote it," Broff said. "Ken

and I talked about it and I drafted it. We felt it could be something that would get talks going."

### **Grebey Annoyed**

When Grebey first discussed the Moffett plan publicly early Saturday morning, he displayed annoyance that it had been categorized as a proposal — he labeled it "suggestions" — and that details had been made public.

"It's most unusual," he said "for suggestions from a third party to be presented to the press and played on national televisioo before they are fully discussed at the bargaining table."

Grebey then said the owners could not accept the plan "line by line, word by word with no

changes."
When he appeared at the press briefing at the lunch break, Grebey said, Based upon the content of the mediator's proposal and the demand of the Players Association to accept it in into, we reject it."

After stating the owners' two major objections to the plan, bowever, he said: "There are many aspects of it that are oot objectionable and are open to negotiation.

Counterproposal

Miller said the owners did not address their objections to Moffett's proposal as be said they had promised to do. Grebey, however, aid the owners' counterproposal did just that. In that counterproposal, made

Friday night, the owners divided the teams into levels within each league but called for professional compensation in all cases. The difference in the levels dealt with the oumber of players a team signing a premier free ageot could protect from being available as compensa-

if the signing club finished in the top level, it would be able to protect 21 players; in the middle level, 23, and in the lower level 25. There would be no payment for compensation players.
The owners also proposed

lowering to 10 from 12 the maximum number of premier free agents for whom professional compensation would be required. The maximum, however, could change in the third year, 1983, if there were fewer than 10 premier free agents in the 1982 draft.

All-Star Game Postponed

CLEVELAND (AP) - Bowie Kuhn, the baseball commissioner. has announced that the all-star game, originally scheduled for July 14, has been postponed indefinitely because of the strike.

We hope that when our player problems are settled we can reschedule the game, although it is impossible at this time to set a specific date." he said.

CFL Standings

### Red Smith: On Making a Pilgrimage to Mecca, Maine over. 'About 12 mouthfuls,' be kept in the plant. A one-year sup-

were these two kids in Green Bay, Wis., faithful readers of "Boys' Life" and "The American Boy." Both magazines carried seductive advertisements for the Old Town canoe, and the kids had a dream. If they had an Old Town canoe they would ship it by rail to the Chain of Lakes country in the northern Wisconsin woods, paddle through the lakes to the source of the Wisconsin River, ride the Wisconsin southwest to the town of Portage, where a mile overland would take them to the headwaters of the Fox, which flows northeast

### Compound Nuisance

TEW YORK — A new and virulent strain of compound

adjectives is attacking the body of Two decades ago, "-related" was the neavy-use compounder, a favorite of people who littered their sentences with "in terms of" and vis-a-vis." I still get complaints about this: R.R. 11 12

leffels of Richmond, British Columbia, kicks about "the mania for compounding adjectival clusters using related health-related problems, comrors, family-relat-

ed incest. Then came "-oriented." If you had a word-oriented mind, you could watch the jargon-oriented people take their action-oriented siestas. The assistant secretary of state assigned to Pacific-related af-fuirs was called "Orient-oriented." Today the hot new combining form for adjectives is "-intensive. Robert Sisco of Piscataway, N.J., sends in this clipping from The Bridgewater Courier News: "The

most effective way to overcome dryness is to install a humidifier in the home. Unfortunately, this method is cash-intensive. A cheaper but labor-intensive method is to place dampened cheesecloth over your radiators." The temptation is to stuff damp-

aned cheesecloth into the speaker's pretension-intensive mouth. This comoound began, I think, with "fabor-intensive," soon followed by "capital-intensive." Margaret Mead nominated both words for inclusion in the American Heritage Dictionary in 1975, but the lexico-

#### Body of Italian Boy Removed From Well

The Associated Press FRASCATI, Italy — Miners and firemen have recovered the body of a 6-year-old boy from an abanooned well, 31 days after he fell

The miners dug for seven days before reaching the boy, Alfredo Ramoi, Saturday after boring through the last 70 centimeters (2 feet 1 of rock and soil. Authorities issued a statement on June 14 declaring him dead after rescue efforts failed

graphers wanted to wait for more citational evidence.

Came the avalanche. Nobody now says "requiring heavy investment" when "capital-intensive" will do, and "labor-intensive" has been stretched to include "backbreaking." In an article by Steve Lohr in The New York Times Magazine about semiconductors and microprocessors early this year, the writer held: "Unlike steel, autos and some others, this industry has never been an oligopoly. . It has always been a brain-in-

tensive industry, rather than a cap-ital-intensive one." Disoriented economists tend to get pedantry-intensive; the solu-tion-related answer is to laugh them out of it.

A DOCUMENT has been leaked to me by a mole in the Department of Commerce. It is a memorandum on stylistic prefer ences from Jean Jones, who is director of something called the "Ex-ecutive Secretariat." (So that's what happened to the typing pool. Who wants to be the lifeguard at

the Big Shot's Typing Pool?)
Miss Jones is my kind of executive secretary. She quotes her boss, Commerce Secretary Malcolm Baldrige, as one who wants prose "halfway between Ernest Hemingway and Zane Grey with no bureaucratese." Let us go across the river and into the riders of the purple sage:

"Discontinue using the following words," she adjures her co-workers, and lists "viable, input, image, orient, maximize, therein": instead of "delighted," and urges "ongoing" be replaced by "is in process" or "is moving forward.

She then plays "The Killers" to writers of the purple prose: "Discontinue using the following phrases: prior to (use 'before'), subject matter, very much, share (as in 'share your concern'), as you know, more importantly (use 'more important'), needless to

I'm with Executive Secretariat all the way. (Could it be that a great racehorse has, in retirement, become a business leader?) Hats off to the Commerce Department's timely assault on stereotypes and bromides. At the suggestion of my colleague, Ed Cowan, I am pleased to add only this: Discontinue "dis-continue." Use "stop."

New York Times Service

# A Mansion for Daddy Warbucks

By Michael deCourcy Hinds

New York Times Service
NEW YORK — The set designers needed
a mannion for sheating the a mansion for shooting "Annie," Col-umhia Pictures' film version of the long-running Broadway musical. But not just any mansion. The director, John Huston, wanted one that could easily house the film's eccentric hillionaire, Daddy Warbucks, and copies of such colossal status symbols as Rem-brandt's "Night Watch," the Winged Victory and the Venus de Milo.

For months, nothing appropriate turned up. The best houses had long since become museums, and, according to Dale Hennesy, the production designer, others, like the familiar palaces of Newport, R.I., had lost their ability to to dazzle by appearing in too many films and television commercials.

"All along, the scout manager kept telling me about some administration building at a college he had attended in New Jersey," Hennesy said. The description did not sound very promising. "Finally, when we were getting behind, I said, 'Let's go see it.' And the minute I walked in the house, I said, 'This is it! This is Daddy Warbucks!

The limestone mansion, the centerpiece of the Monmouth College campus in West Long Branch, N.J., is modeled after Ver-sailles. While it is not as large, it conveys a similar sense of overreaching extravagance.

Annie (Aileen Quinn) with Daddy Warbucks (Albert Finney) during filming.

Garden side of Shadow Lawn

Shadow Lawn, as it is called, has 130 rooms, not including the 2,500-square-foot main hall with its 75-foot Venetian glass ceiling. At night, lamps above the stained glass make it glow like a display case at Tiffany's. For guests, there were 17 master suites of Chinese, Japanese, French, English, Spanish and other national designs. There is a theater seating 300 people, a gymnasium, two bowling alleys and a billiard room and, outside, a nine-hole golf course. It is a palace of marble in 48 varieties, petrified woods, mirrors — 1,500 of them — gold leaf and rare inlaid

The three-story, \$10.5-million mansion was designed in the 1920s by Horace Trumbauer for Hubert T. Parson, who was pre dent of the F.W. Woolworth Co. until 1932. It took three years to design, three years to build and two years to decorate, and within 10 years Parson lost it to the town for nonpayment of \$132,000 in taxes. After serving as a military academy, a military hospital and a girls' school, the mansion and its 108 acres were bought in the 1950s by the private

Shadow Lawn, described in "Great American Mansions and Their Stories" as one of the 20 principal mansions in the United States, is the setting for almost half of "An-nie. The film, budgeted at \$35 million and scheduled for release next year, is based on the late Harold Gray's 57-year-old comic strip, "Little Orphan Annie." It stars Alleen Quinn as Annie, Albert Finney -- his head shaved — as Daddy Warbucks and Carol Burnett as the scheming orphanage director, Miss Hannigan.

#### Palace Aforethought

"It was as though the mansion was built knowing that someday we were going to come and shoot 'Annie' here," said Hennesy, who is responsible for "the overall look" of the film. He recalled that the house was al-

ready leased for the production when he remembered that a swimming pool was needed.
"I called the college and asked if there was a gym pool nearby that we could dress up. Sure there was a pool, they said — right in the mansion, just like it was written in the

Although the college had converted the room housing the pool into a warehouse, its white marble walls, mosaic floors, leaded mirror ceiling and stained glass windows were still in mint condition. Only the pool, once gold-leafed, needed painting.

Joseph Layton, executive producer and supervisor of the musical production, said: The main hall lent itself beautifully to big. far-ranging numbers. We did Annie's I Think I'm Going to Like It Here' number to make a grand tour of the downstairs rooms." The tour included the Verszilles dining room, with its Byzantine paneled and gold-leafed ceiling the Pompeii Room, a breakfast room with inlaid marble walls, and the Parisian li-brary, where the bookshelves are hidden behind doors decorated with gold-embossed leather book bindings.

To "dress" the mansion for the film, the set designer, Marvin March, toured it only once, but he took hundreds of photographs and carried the building's architectural draw-ings back to his studio in Burbank, Calif.

Once the filmmakers had restored some of the mansion's former glories, Monmouth students, accustomed to classes in bare rooms there, did double takes.

Jodi Leitstein, who graduated this year, commented: "We just took the place for granted until they brought in the furniture. When I saw it all set up, I said, Wow! Has this been there all the time? I'll be sorry when the magic is gone and it becomes a

### Reagan Sought to Shed PEOPLE: Reagan Sough to She Boy-Next-Door' Roles

One thing seems more and more versual relationship that lasted certain about President Reagan as eight years with Queen Elizabeth's time goes by: He used to write a lot of letters. They keep popping up at autograph auctions, many of them conducted by Charles Hamilton, the New York dealer. At an auction on Aug. 6, Hamilton will offer a 1950 letter in which Reagan expressed concern that his acting career might be slipping into a rut because he was playing "the boy next door" too often. The letter, on stationery of the Plaza Hotel in New York, was to Sam Berns, a Los Angeles scriptwriter, and the actor who would become president told him: "You have a good story there and it should make a good picture but I feel it is too much of the thing I personally must break away from. My career started to slip into a 'boy next door' and 'mice fellow' type of thing and I still have some of those unreleased — including one in which I play a lawyer. For that reason I honestly

On his visit to Rio de Janeiro last July, Pope John Paul II went to a favela — a community of the des-perately poor — known as Vidigal. He climbed a steep dirt road to the shim, where he received a tumultuous welcome. The pope was so stirred by his reception that he took a gold ring from his finger and donated it to the favelados, or shum dwellers, of Vidigal. Now, the community has decided that, even for the poor, it is better to give than to receive, and has turned the ring over to Cardinal Engento Salles for display in a Nanonal Museum of Sacred Art in Rio's cathedral. "It's very clear that this represents the desire of the community," says Paulo Roberto Muniz, president of the Associa-tion of Residents of Vidigal. "The ring was not given exclusively to the residents of Vidigal, but to all the favelados." For remembrance, though, a replica of the ring will be kept in a chapel in Vidigal that the pontiff had dedicated on his visit.

\$400 for this one.

Roddy Llewellyn, the former escort of Princess Margaret, was married in Marlow, England, on Saturday to Tania Soskin, a fashion designer and travel writer. Liewellyn, 33, a former commune dweller who earns a living designing and fitting out gardens for wealthy Londoners, had a controyounger sister. His engagement to Miss Soskin, 32, the daughter of the late film producer Paul Soskin, was announced in April. The wedding at All Saints parish church was attended by Bianca Japper and other members of the international jet set. But the princess, now on a trip abroad, was not there.

Princess Margaret and her daughter, Lady Sarah Armstrong-Jones, arrived Saturday at Gravenhurst, a resort town in Ontario for a private weekend visit. She was welcomed by the provincial licutenant governor, John Aird, who will play host to the princess and her daughter at his cottage. Tem-ple Trees, at Port Carling, Ont. Aird said the royal visitors will spend the weekend in a family en-vironment. Princess Margaret and her daughter are scheduled to remust say 'no.' It wouldn't work out." Reagan letters have been selling at good prices, Hamilton said, and he expects to get at least turn to Britain on Monday.

> Gioria Steinem told a seminar in Albuquerque, N.M., that women should give 10 percent of their salaries to the fight for social justice. "We have not used our grass-roots strength and translated it" at the polls, the author and editor of Ms. magazine told the Women's Political Caucus, "Give 10 percent of your salary," Steinem urged the 700 persons in her audience, to support women's hotlines, wonen's centers and political action groups. Steinem, a founder of the caucus a decade ago, said opponents of women's rights balk at reproductive freedom because it challenges the established order. "If we can't control our bodies from the skin in, we can't control our lives from the skin out," she

Opera buffs in Peking gave Sar-ah Caldwell a tumultuous ovation on Saturday after the Boston Opera director conducted her first performance of Verdi's "La Traviata" in the Chinese capital. A capacity audience of 1,700 applauded for Miss Caldwell until she went on stage to take her bows along with the Chinese singers and musicians of Peking's Central Op-era Co. During intermissions, members of the audience gathered at the edge of the orchestra pit to view Miss Caldwell, who was dressed in red, white and blue.

# The IHT maintains a sense of proportion. You'd subscribe to that, wouldn't you?

People who shape the world can't afford to see it from just one angle. Nor to let nearby events obscure what's happening elsewhere.

That's why successful people in 143 countries read the International Herald Tribune each day. Printed in Paris, London, Zurich and Hong Kong, it has a uniquely international vantage point... a world view that sheds new light on distant events and places national news in a global context.

Each day, the Trib carries over 40 international datelines. Rigorously objective fact balanced with astute analysis. Informed opinion spiced with

incisive humor. Plus sports and culture, features and funnies, puzzles and . personalities.

Compact and concise, quick and clear, the Trib is designed to suit the lifestyle, fit the workstyle of today's decision makers. People who give each thing the time it's worth. People with a sense of proportion.

Receive the IHT every day at your home or office. Take advantage of our special introductory discount: 25% off the regular subscription rate or up to 42% off the newsstand price, depending on your country of residence. Return the coupon today. Benefit from a broader viewpoint.
